The Mind Electric Pria Anand,2025-06-10 In this collection of medical tales

reminiscent of Oliver Sacks the best of medical writing Abraham Verghese author of The Covenant of Water a neurologist reckons with the stories we tell about our brains and the stories our brains tell us A girl believes she has been struck blind for stealing a kiss A mother watches helplessly as each of her children is replaced by a changeling A woman is haunted each month by the same four chords of a single song In neurology illness is inextricably linked with narrative the clues to unraveling these mysteries hidden in both the details of a patient s story and the tells of their body Stories are etched into the very structure of our brains coded so deeply that the impulse for storytelling survives and even surges after the most devastating injuries But our brains are also porous the stories they concoct shaped by cultural narratives about bodies and illness that permeate the minds of doctors and patients alike In the history of medicine some stories are heard while others the narratives of women of Black and brown people of displaced people of disempowered people are too often dismissed In The Mind Electric neurologist Pria Anand reveals through case study history fable and memoir all that the medical establishment has overlooked the complexity and wonder of brains in health and in extremis and the vast gray area between sanity and insanity doctor and patient and illness and wellness each separated from the next by the thin veneer of a different story Moving from the Boston hospital where she treats her patients to her childhood years in India to Isla Providencia in the Caribbean and to the Republic of Guinea in West Africa she demonstrates again and again the compelling paradox at the heart of neurology that even the most peculiar symptoms can show us something universal about ourselves as humans

Scheherazade's Children Philip F. Kennedy, Marina Warner, 2013-11-08 Scheherazade's Children gathers together leading scholars to explore the reverberations of the tales of the Arabian Nights across a startlingly wide and transnational range of cultural endeavors The contributors drawn from a wide array of disciplines extend their inquiries into the book's metamorphoses on stage and screen as well as in literature from India to Japan from Sanskrit mythology to British pantomime from Baroque opera to puppet shows Their highly original research illuminates little known manifestations of the Nights and provides unexpected contexts for understanding the book's complex history Polemical issues are thereby given unprecedented and enlightening interpretations Organized under the rubrics of Translating Engaging and Staging these essays view the Nights corpus as a uniquely accretive cultural bundle that absorbs the works upon which it has exerted influence In this view the Arabian Nights is a dynamic living and breathing cross cultural phenomenon that has left its mark on fields as disparate as the European novel and early Indian cinema While scholarly the writers approach is also lively and entertaining and the book is richly illustrated with unusual materials to deliver a sparkling and highly original exploration of the Arabian Nights radiating influence on world literature performance and culture
