economic reasoning Specific topics covered include doping match fixing for betting or sporting gain the role of forensic statistics in detecting nefarious activity issues related to club ownership corruption in the awarding of mega events and within sports governing bodies and the role of the law and the Court of Arbitration for Sport In the final chapter the Editors pull together the various strands and propose that policy to mitigate the threat to fair play should be built around two themes improving sports governance and designing incentives to help actors in sport choose honest over manipulative behaviour The book will appeal to practitioners from sport management as well as to academics including students and researchers
