Stock Market Crashes of 1998 and 1999 Raveendra N. Batra, 1997 **Business India**, 1998 **Money Upside Down** Harald Haas, 2004 A historic analysis of the evolution of money and credit reveals how the nature of money changed private property plus interest tally sticks coinage fractional reserve banking gold standards fiat currencies debasement of fiat against gold The results of the historic analysis are combined with the new theories of money credit and finance of Bethmann Heinsohn Kindleberger Kutyn Malik Martin Minsky Nuri Rothbard Soddy Soros and Steiger Their integration forms a stringent economic theory that is able to explain the past and present economic and financial system from a very new perspective executing a paradigm shift in economics finance and monetary theory Subject Guide to Books in Print, 1991 National Competitiveness and Economic Growth Timo J. Hämäläinen, 2003 The current paradigm shift in the world economy is challenging the traditional competitiveness and growth theories with their few explanatory variables This book offers a more holistic framework to synthesise the key findings of the various branches of competitiveness and growth research The author illustrates this framework with a new long wave theory of socio economic development This theory emphasises the competitiveness and growth benefits of rapid structural adjustment in the rapidly changing techno economic environment Based on thorough analysis the author argues that both markets and governments have become less efficient due to the current transformation of the world economy His empirical data from 22 OECD countries in the 1980s and 1990s illustrates that efficiency and growth oriented governments have significantly contributed to their countries economic success National Competitiveness and Economic Growth will furnish its readers with a better understanding of the interdependencies of many important but seemingly unrelated aspects of modern economies and societies for example the dynamics of business and technology and cultural and institutional change It will appeal to economists business professionals and policymakers with a special interest in the competitiveness and growth of firms and national economies as well as the long term development of socio economic systems *Extensions to the Dirichlet*
