**Routledge Handbook of Food in Asia** Cecilia Leong-Salobir, 2019-02-25

Throwing new light on how colonisation and globalization have affected the food practices of different communities in Asia, the Routledge Handbook of Food in Asia explores the changes and variations in the region's dishes, meals, and ways of eating. By demonstrating the different methodologies and theoretical approaches employed by scholars, the contributions discuss everyday food practices in Asian cultures and provide a fascinating coverage of less common phenomena such as the practice of wood eating and the evolution of pufferfish eating in Japan. In doing so, the handbook not only covers a wide geographical area including Japan, Indonesia, Vietnam, Singapore, India, China, South Korea, and Malaysia, but also examines the Asian diasporic communities in Canada, the United States, and Australia through five key themes: Food Identity and Diasporic Communities, Food Rites and Rituals, Food and the Media, Food and Health, and Food and State Matters. Interdisciplinary in nature, this handbook is a useful reference guide for students and scholars of anthropology, sociology, and world history, in addition to food history, cultural studies, and Asian studies in general.

*Science and Scientification in South Asia and Europe* Axel Michaels, Christoph Wulf, 2020-03-11 This volume critically examines the role of science in the humanities and social sciences. It studies how cultures and societies in South Asia and Europe underwent a transformation with the adoption or adaptation of scientific methods, turning ancient cultural processes and phenomena into an enhanced scientific structure. The chapters in this book discuss the development of science as a method in modern and historical contexts and the differences between modern science, scientification and pseudoscience. Study the interactions between bodies of knowledge such as Sanskrit and computer science, mathematics and Vedic mathematics, science and philosophy. Drawing on textual material, extensive fieldwork and in-depth interviews, this book will be of great interest to scholars and researchers of philosophy, Indology, history, linguistics, history and philosophy of science and social science.

The History of the Book in South Asia Francesca Orsini, 2016-12-05 The History of the Book in South Asia covers not only the various modern states that make up South Asia today but also a multitude of languages and scripts. For centuries it was manuscripts that dominated book production and circulation and printing technology only began to make an impact in the late eighteenth century. Print flourished in the colonial period and in particular lithographic printing proved particularly popular in South Asia both because it was economical and because it enabled multi-script printing. There are now vibrant publishing cultures in the nation states of South Asia and the essays in this volume cover the whole range from palm leaf manuscripts to contemporary print culture.

Consumption in Asia Beng-Huat Chua, 2002-05-03 The essays in this collection challenge conventional ideas about consumption and consumerism. They consider if the inundation of Western consumer goods has created identity confusions among the affluent in Asia and if the expansion of consumer culture really does threaten the stability of politically anti-liberal states in Asia. This is the first book to analyse in detail consumerism in the region and will be valuable reading for students and researchers in Asian studies, economics, politics and cultural studies.
