Competition Chukwudumogu, Chidozie G., 2021-12-10 This comprehensive book adopts a nuanced yet straightforward approach to analysing the complex phenomenon of international tax competition Using the ongoing international efforts of the Organisation for Economic Co operation and Development OECD and the European Union EU as a basis for its analysis it explores the mixed effects of tax competition and offers an effective approach that takes account of the asymmetrical global context Regional Growth, Interstate Tax Competition United States. Advisory Commission on Intergovernmental

Relations, 1981 Examines the issue of whether interstate tax competition has brought about any significant differential regional growth pattern In particular the Commission addresses the intergovernmental concern of whether the economic health of states is being adversely affected to the point that federal intervention to curb competitive interstate tax activities is warranted Page iii Foreign Direct Investment and Tax Competition John H. Mutti, 2003 Addresses the nature and extent of the international mobility of foreign direct investment and how tax competition is affecting the structure of national tax systems and how efforts at international coordination of tax policy will affect such changes **Capital Mobility and Tax**

Competition Clemens Fuest, Bernd Huber, Jack Mintz, 2005 Tax competition and coordination is one of the most pressing issues for tax authorities in modern economies but it is a highly controversial subject Some argue that tax competition is beneficial by forcing governments to impose efficient tax prices on residents for the provision of public services Further some argue that tax competition is also beneficial by limiting the power of governments to levy taxes Others take a different view in a world without coordinated tax policies governments choose sub optimal levels of public services financed by inefficient taxes that are either too high or too low by ignoring spillovers imposed on other jurisdictions Capital Mobility and Tax Competition draws out the most important issues of uncoordinated tax policy at the international level for cross border transactions The discussion focuses on mobile tax bases specifically in relation to investment and financial transactions The main issue for consideration in this survey is whether taxation of income specifically capital income will survive how border crossing investment is taxed relative to domestic investment and whether welfare gains can be achieved through international tax coordination This survey derives some of the key results on the taxation of international investment in variants of one model of multinational investment Finally the authors emphasize the problem of tax competition and financial arbitrage an issue which is somewhat neglected in the existing survey literature **Race to the Top and Race to the**

Bottom: Tax Competition in Rural China Xiaobo Zhang, 2008 **State Tax Competition ("Guerra Fiscal")** Sergio Mitsuo Vilela, 2023-08-29 Brazil has a very peculiar tax collection power distribution and revenue sharing system that splits

three way the consumption tax giving taxation powers over goods circulation to the States over services to the Municipalities and over production to the Union The Brazilian State circulation of goods tax whose regulations require unanimity to incentives and benefits concessions even though the 27 Brazilian States development state are disparate generates a fiscal war State competition that costs 30 billion Brazilian Reais 6 billion Swiss Francs yearly and the attempts at settling State Competition are clearly failing while Switzerland which has a similar political organization seems to have a reasonable and functional system This dissertation requirement for the obtaining the title of Doctor in International Tax law takes a case study approach to compare these two systems specifically taxable events financial transfer mechanisms and their rules to avoid State Canton tax competition to assess if the Swiss system for tax collection power distribution and revenue sharing is a feasible solution to reduce the adverse effects of State tax competition in Brazil

Globalization, Tax Competition and the Future of Tax Systems Mr.Vito Tanzi,1996-12-01 This paper discusses the implications for tax systems of globalization of capital markets and of economies It shows the extent to which particular taxes are affected by the globalization process It speculates on future developments in this area and on tax competition

Fiscal State Aid Law and Harmful Tax Competition in the European Union Dimitrios Kyriazis,2023 Dimitrios Kyriazis investigates the use of state aid rules against national tax measures examining ECJ judgments of the early 2000s as well as the recent Commission decisions and investigations into tax schemes and individual tax rulings

Harmful Tax Competition An Emerging Global Issue OECD,1998-05-19 Tax competition in the form of harmful tax practices can distort trade and investment patterns erode national tax bases and shift part of the tax burden onto less mobile tax bases The Report emphasises that governments must intensify their cooperative actions to curb harmful tax practices

Tax Coordination, Tax Competition, and Revenue Mobilization in the West African Economic and Monetary Union Mario Mansour,Mr.Gregoire Rota Graziosi,2013-07-09 We review the current state of the West African Economic and Monetary Union s tax coordination framework against the main objectives of the WAEMU Treaty of 1994 reduce distortions to intra community trade and mobilize domestic tax revenue The process of tax coordination in WAEMU is one of the most advanced in the world de jure at least but remains in many areas ineffective de facto Nevertheless the framework has to some extent succeeded in converging tax systems particularly statutory tax rates and may have contributed to improving revenue mobilisation Important lessons can be drawn from the WAEMU experience particularly in terms of whether coordination should take the form of harmonization through a top down approach or a softer approach of sharing best practice and limiting certain types of tax competition

The Impact of Profit Shifting on Economic Activity and Tax Competition Mr.Alexander D Klemm,Ms.Li Liu,2019-12-20 A growing empirical literature has documented significant profit shifting activities by multinationals This paper looks at the impact of such profit shifting on real activity and tax competition Real activity can be affected as profit shifting changes and theoretically most likely reduces the cost of capital Tax competition even over real capital is affected because a permissive

attitude toward profit shifting can be seen as a selective tax reduction for multinationals Tightening profit shifting rules in turn can affect tax competition through the main rate This paper discusses these issues theoretically and with the help of a simulation to assess the impact of profit shifting on investment revenues and government behavior Using the theoretical framework it also provides a brief overview of the related empirical literature

International Tax Competition Rajiv Biswas, 2002 Many Commonwealth developing countries are potentially affected by the EU and OECD initiatives to regulate international tax competition These articles by experts from Commonwealth countries discuss the concerns of affected nations covering globalisation fiscal sovereignty WTO issues and more

Policy Responses to Tax Competition David R. Agrawal, 2025-10-06 A critical examination of the effects of tax competition Policy Responses to Tax Competition provides an in depth exploration of how jurisdictions design taxes on mobile economic factors Tax competition between jurisdictions that seek to attract businesses and residents presents both opportunities and challenges It can foster government efficiency and provide a counterweight to lobbying for increased spending but it can also result in inefficiently low tax rates and revenue shortfalls as jurisdictions vie for tax bases This volume examines the economic drivers and consequences of tax competition and presents empirical evidence on its effects Divided into three parts the book first reviews existing research on the determinants and consequences of tax competition and related policy initiatives such as development incentives The second section focuses on specific policies such as the Kansas Missouri noncompete pact and international measures like the OECD's Base Erosion and Profit Shifting initiative that are designed to limit tax competition It also considers the economic responses to these policies the distributional impact of competition reducing policies and potential strategic reactions of other governments The final section presents case studies of the effects of various policies including inter municipal cooperation in France and corporate tax equalization in Switzerland Altogether this volume provides new insights into the nature of inter jurisdictional tax competition and the range of potential responses available to jurisdictions at various levels in federal systems

National Tax Policy in Europe Krister Andersson, Eva Eberhartinger, Lars Oxelheim, 2007-09-04 European taxes have long been debated for their potential role as barriers to increased investment and welfare The discussion has often circulated around the size of the tax bases and the magnitude of the tax rate In this book we argue that in the taxation context the European Union EU is at a cross road facing strong forces pushing it into two polar positions One of these is the scenario with all welfare provided by the national regime and financed by taxes collected entirely by national authorities The other extreme is the situation where all welfare is fered at an EU level financed entirely by taxes collected at that level The two forces pressing the tax situation into one of these two poles are spelt tax compe tion and welfare arbitrage The research question addressed in this book covers the existence of a potential steady state in between these to poles Our basic pothesis is that their might be such a steady state due to the immobility of some tax bases and where the taxation of these bases have no externalities affecting vestment We argue that the very complex tax structures of Europe and the tax certainty facing

investors in Europe need to be addressed in a comprehensive way Institutional Competition Andreas Bergh, Rolf Höijer, 2008-01-01 This book has much to commend it because of the richness and diversity of the issues addressed Indira Rajaraman Tax Justice Focus The volume offers substantial insights into the nature of institutional competition focusing mostly on governmental institutions and shows the many subtleties in understanding and analyzing the role of institutions Institutional competition is a small subset of institutional analysis but an important one and while the volume does cover the more familiar tax and expenditure topics it also delves more deeply into the subject Randall G Holcombe Public Choice While economists typically praise the merits of competition among market based enterprises they are not so sure when it comes to competition among institutions especially governments I am aware of no better source for thoughtful reflection on competition among institutions than the ten essays presented in this book Richard E Wagner George Mason University US Why is competition between institutions usually viewed in a negative light when competition is considered positive in most other economic contexts The contributors to this volume introduce new perspectives on this issue analytically and empirically exploring reasons for this perception Negative assessments of institutional competition emphasize that such competition may lead to a race to the bottom in terms of eroding government revenues redistributing wealth from workers to capitalists and limiting democracy by forcing politicians to prioritize international investment capital rather than working for their voters In this volume however many of the essays draw attention to the positive learning and information effects The contributors conclude that competition may actually lead to institutions becoming more efficient in allocating resources Students and scholars of economics political economy international relations and political science will find the book's non traditional take on institutional competition a must read as will policy analysts and those with an interest in taxation and welfare states

Interjurisdictional Tax and Policy Competition Daphne A. Kenyon, 1991 *Tax Competition and Tax Coordination when Countries Differ in Size* S. M. Ravi Kanbur, Michael Keen, 1991 Differences in country size exacerbate the inefficiency of tax competition harming both a smaller country and a larger one But different forms of tax cooperation can have very different effects The smaller country would lose from harmonizing tax rates but both would gain from imposing a minimum tax The optimal joint response to freer cross border trade however may be to do absolutely nothing Catching Capital Peter Dietsch, 2015-07-01 Rich people stash away trillions of dollars in tax havens like Switzerland the Cayman Islands or Singapore Multinational corporations shift their profits to low tax jurisdictions like Ireland or Panama to avoid paying tax Recent stories in the media about Apple Google Starbucks and Fiat are just the tip of the iceberg There is hardly any multinational today that respects not just the letter but also the spirit of tax laws All this becomes possible due to tax competition with countries strategically designing fiscal policy to attract capital from abroad The loopholes in national tax regimes that tax competition generates and exploits draw into question political economic life as we presently know it They undermine the fiscal autonomy of political communities and contribute to rising inequalities in income and wealth Building

on a careful analysis of the ethical challenges raised by a world of tax competition this book puts forward a normative and institutional framework to regulate the practice In short individuals and corporations should pay tax in the jurisdictions of which they are members where this membership can come in degrees Moreover the strategic tax setting of states should be limited in important ways An International Tax Organisation ITO should be created to enforce the principles of tax justice The author defends this call for reform against two important objections First Dietsch refutes the suggestion that regulating tax competition is inefficient Second he argues that regulation of this sort rather than representing a constraint on national sovereignty in fact turns out to be a requirement of sovereignty in a global economy The book closes with a series of reflections on the obligations that the beneficiaries of tax competition have towards the losers both prior to any institutional reform as well as in its aftermath

The Benefits of Tax Competition Richard Teather, 2005 Beginning with a primer on international taxation this IEA monograph shows why the arguments used by governments to prevent tax competition are fallacious It also outlines the threats to tax competition from the EU and OECD and proposes ways in which the UK government should respond to those threats
