**The Economics of Tax Policy** Alan J. Auerbach, Kent Andrew

Smetters, 2017 Debates about the optimal structure for tax policies and tax rates hardly cease among public policy or academic audiences. These have only grown more heated in the United States as the gap between incomes of the wealthiest 1 percent and the rest of the population continue to diverge. Tax research perhaps has not fully kept pace with the relentless demand of various interests to adjust tax policy. Nonetheless, specialists in the economics of tax policy in recent years have profited from advances in economic theory, econometric measurements and data quality and access that are beginning to allow a greater consensus on what are the real effects of tax policy and how government levies affect individuals and businesses. The volume edited by Professors Auerbach and Smetters represents an attempt to reduce the lag between the conduct of research on tax issues and its transmission to a broader public. The contributions would explore highly topical issues such as the effects of income tax changes on economic growth, the potential effects of capping certain tax expenditures, the economics of adjusted business tax policy and environmental tax options. Other essays would investigate perennially important themes such as the conduct of tax administration, the growing role of the tax system on education policy, tax policy toward low income families, capital gains and estate taxation and tax policy for retirement savings. A final paper would examine three different options for fundamental tax reform.
