Tax Policy And The Economy Hc 2004

Dominic de Cogan

Tax Policy And The Economy Hc 2004:

The Political Economy of Corporation Tax John Snape, 2011-12-09 Excellent technical writing on corporation tax abounds but it tends to be inaccessible to public lawyers political theorists and political economists Although recent years have seen not only an explosion in public law scholarship but also a reawakening of interest in interpretative political theory and political economy the potential of these perspectives to illuminate the corporation tax debate has remained unexplored In this important work John Snape seeks to reconcile these disparate strands of scholarship and to contribute to a new way of understanding and conceptualising the reform of the law relating to corporate taxation Drawing on important developments in public law scholarship the study combines elements of political theory and political economy It advances a new interpretation of corporation tax law as an instrument of rule through the maximisation of a nation's economic potential Snape shows how corporate taxation belongs at the centre of any discussion of economic globalisation not only because of the potential of national tax systems to influence inward investment decisions but also because of the potential of those decisions to shape the public interest that those tax systems might embody Following public law and politics models the book looks afresh at the impact of Britain's political institutions of the processes of its representative government and of the theory that moulds and orders the values that the corporation tax code contains This is a timely exploration of cutting edge issues of public policy

A Comparative History of Motor Fuels Taxation, 1909-2009 Carl-Henry Geschwind, 2017-05-09 Slowing down global warming is one of the most critical problems facing the world's policymakers today One favored solution is to regulate carbon consumption through taxation including the taxation of gasoline Yet gasoline tax levels are much lower in the United States than elsewhere Why is this so and what does it tell us about the prospects for taxing carbon here A Comparative History of Motor Fuels Taxation 1909-2009 Why Gasoline Is Cheap and Petrol Is Dear examines these questions by tracing the evolution of gasoline tax policies in the United States Germany the United Kingdom and New Zealand since the early twentieth century In the process it highlights the crucial role played by fiscal crises

Tax Law, State-Building and the Constitution Dominic de Cogan, 2020-08-06 This monograph looks at how tax is intertwined with constitutional law and the state in the UK It looks at a variety of topics including tax devolution scrutiny and reform of tax legislation the protection of taxpayers and the domestic legal processing of international rules and problems Tax Law State Building and the Constitution presents and interrogates five key claims First there is a clear overlap between the concerns of tax and constitutional lawyers Secondly the tax system is being deeply affected by the fast pace of constitutional change Thirdly decisions taken in the tax field are likely to have a reverse influence on the evolution of the constitution Fourthly these relationships are heavily context dependent with tax making all the difference to some ongoing constitutional controversies whilst having very little to do with others Fifthly by acknowledging tax as an important moving part within the contemporary constitution we might understand both tax and constitutional law a little better The book therefore contributes to deeper

theoretical debates on the identity of tax law as a discipline the relevance of tax to public lawyers the meaning of state building in the recent history of a developed country and the importance of public finances to a wider sense of what is going on These are questions that ought to command the attention of tax and constitutional law academics as well as policy makers and reformers Runner up of the 2022 SLS Peter Birks Prize for Outstanding Legal Scholarship

Dimensions of Tax

Design Institute for Fiscal Studies (IFS),2010-04-30 The goal of the Mirrlees Review has been to identify what makes a good tax system for an open developed economy in the 21st century and to suggest how the UK tax system could be reformed to move in that direction As an integral part of the Review this volume brings together thirteen studies of different dimensions of tax design plus associated commentaries These were commissioned from IFS researchers and other international experts to be of interest and value in their own right as well as to provide inspiration for the final report of the Review which is published as a separate volume Tax by Design The Commission s work was directed by Tim Besley Richard Blundell Malcolm Gammie James Poterba The Commission s editorial team Stuart Adam Stephen Bond Robert Chote Paul Johnson Gareth Myles

The Economic Constitution Tony Prosser,2014-03-13 There has been little analysis of the constitutional framework for management of the UK economy either in constitutional law or regulatory studies This is in contrast to many other countries where the concept of an economic constitution is well established as it is in the law of the European Union Given the extensive role of the state in attempting to resolve recent financial crises in the UK and elsewhere in Europe it is particularly important to develop such an analysis This book sets out different meanings of an economic constitution and applies them to key areas of economic management including taxation and public borrowing the management of public spending including the Spending Review monetary policy financial services regulation industrial policy including state shareholdings and government contracting It analyses the key institutions involved such as the Treasury and the Bank of England also including a number of less well known bodies such as the Office for Budget Responsibility There is also coverage of the international context in which these institutions operate especially the European Union and the World Trade Organisation It thus provides an account of the public law applying to economic management in the UK This book also adopts a critical approach assessing the degree to which there is coherence in the arrangements for economic management the degree to which economic policy making is constrained by constitutional norms and the degree to which economic management is subject to deliberation and accountability through Parliament the courts and other institutions

Mitchell Polinsky,Steven Shavell,2007-11-07 Law can be viewed as a body of rules and legal sanctions that channel behavior in socially desirable directions for example by encouraging individuals to take proper precautions to prevent accidents or by discouraging competitors from colluding to raise prices The incentives created by the legal system are thus a natural subject of study by economists Moreover given the importance of law to the welfare of societies the economic analysis of law merits prominent treatment as a subdiscipline of economics Our hope is that this two volume Handbook will foster the study of the legal system by economists The two volumes form a comprehensive and accessible survey of the current state of the field Chapters prepared by leading specialists of the area Summarizes received results as well as new developments **Handbook of Regional Growth and Development Theories** Roberta Capello,Peter Nijkamp,2019 Regional economics an established discipline for several decades has undergone a period of rapid change in the last ten years resulting in the emergence of several new perspectives At the same time the methodology of regional economics has also experienced some surprising developments This fully revised and updated Handbook brings together contributions looking at new pathways in regional economics written by many well known international scholars The aim is to present the most cutting edge theories explaining regional growth and local development The authors highlight the recent advances in theories the normative potentialities of these theories and the cross fertilization of ideas between regional and mainstream economists It will be an essential source of reference and information for both scholars and students in the field WTO and Direct Taxation Michael Lang,Judith Herdin,Ines Hofbauer,2005-01-01 WTO Law and Direct Taxation are linked in numerous ways The WTO Agreements thereof especially the GATT and GATS Agreements contain several explicit provisions on the subject of direct taxes or even on its delimitation

Parliament, the Constitution, and Property in the United Kingdom Tom Allen,2025-01-02 This book considers whether Parliament recognises a constitutional right to property Parliament is supreme in theory there is nothing to stop it from passing laws to confiscate property Nevertheless MPs often argue that a proposed law would be unconstitutional What does this mean in a system without a written constitution What counts as a sound argument about constitutional rights And what influence do constitutional arguments have on the legislative process The book takes a close look at these questions It reviews legislation and debates from the Middle Ages through to more recent legislation and covers a wide range of topics such as land reform nationalisation taxation regulatory laws and retrospection It also looks at the most recent debates and considers the relevance of constitutional thinking to election manifestos of the main political parties

Institutional Diversity and Innovation

Cornelia Storz, Sebastian Schäfer, 2011-05-27 The concept of innovation systems has gained considerable attention from scholars and politicians alike The concept promises not only to serve as a tool to explain sustained economic development but also to provide policy makers with scientifically grounded policy options to advance the growth of economies The thrust of much recent literature has been to review existing empirical findings in order to deduce best practice models which are assumed to benefit all countries in a similar fashion However as this book argues such universal models often fail in both analysis and policy prescriptions as they do not take into account sufficiently the circumstances and development trajectories of particular countries With a foreword by Richard Whitley this book discusses the extent to which the diagnoses and reform recommendations of recent work on innovation theory and the related policy recommendations actually apply to Japan and China Making links between behavioural economics and institutional analysis the book covers their regulatory framework legal and science system the labour and capital market and intra firm relations It examines the present design and reasons underlying the Japanese and Chinese innovation systems and based on those findings emphasises the necessity for reform to secure the future competitiveness of both countries The book is introduced by a foreword by Richard Whitley Professor of Organisational Sociology at Manchester Business School
