EU Corporate Tax Reform Claudio Maria Radaelli, Alexander Klemm, 2001

The Political Economy of Fiscal Reform in Central-Eastern Europe Frank Bönker, 2006-01-01 Frank Bönker has done a masterful job This is probably the best book available on this important subject and its significance is not limited to studies of

postcommunist societies It has important theoretical implications for everyone interested in the Political Economy of Policy Reform perspective within the field of comparative political economy John L Campbell Slavic Review *An EU Company without an EU Tax?* Karel Lannoo,2002 *Company Tax Reform in the European Union* Joann Martens-Weiner,2006-03-14 Having spent almost fifty years of my life defending the separate accounting arm's length pricing method I have to admit that I was somewhat surprised to be asked to contribute to a book suggesting that the European Union might do well to consider adopting a formulary approach to deal with the taxation of inter and intra company transactions I was even more surprised to see the invitation coming from Ms Joann Weiner an ardent co defender of arm's length pricing and my strong right arm in that regard while we both served in the U S Treasury Department in the mid 90s The book gives Ms Weiner the opportunity to comment frankly from an insider's perspective of the many admitted problems of the arm's length system which could be avoided by a formulary approach Ms Weiner brings to this project a thorough expert knowledge of the benefits and shortfalls of each of the systems she discusses separate accounting v formulary apportionment Who better to decide to give qualified support to formulary than someone who organized a U S Treasury conference to defend arm's length pricing against a Congressional challenge in favor of formulary apportionment Handbook of Research on Public Finance in Europe and the MENA Region Erdoğan, M. Mustafa, Christiansen, Bryan,2016-05-03 Since the 1970s globalization has created an economic environment of interdependency between nations Now many countries in European and the MENA Middle East and Northern Africa regions must grapple with the need to increase public revenue while maneuvering through a global race to the bottom tax competition The Handbook of Research on Public Finance in Europe and the MENA Region explores economic development and public finance by providing critical insight into the use of public finance and policy and illuminating the intricacies of these topics through discussion of theory empirical work and policy objectives This book is ideally designed for business professionals policy makers financiers students and researchers in the fields of public policy and economics **Tax Compliance Costs for Companies in an Enlarged European Community** Michael Lang,2008-01-01 When it comes to taxation administrative costs to the tax authorities and compliance costs to the taxpayers arise A lot of studies have already been conducted in order to shed more light on such hidden costs of taxation Particularly in the field of transfer pricing administrative and compliance costs are assumed to be quite high due to the obligation of computing and documenting an arm's length price for each intra group transaction Apparently European policy makers have also become aware of this problem since the European Commission's report released in 2001 *Company Taxation in the Internal Market* recommends targeted measures in the short run and comprehensive ones in the long run crossing the border line of the currently prevailing transfer pricing approach inter alia in order to combat compliance costs in the field of transfer pricing Eighteen national reports from countries all over the world and a general report deal with the basics of administrative and compliance costs of taxation in general as well as compliance costs in the field of transfer pricing in particular The book is completed by

three special reports on certain issues The findings of the reports included is greatly influenced by the discussions on the occasion of the Jean Monnet Conference on this topic which was held in spring 2006 in Rust Austria under the academic guidance of the Institute for Austrian and International Tax Law at the Vienna University of Economics and Business Administration Back cover *The EU Common Consolidated Corporate Tax Base* Dennis Weber, Jan van de Streek, 2016-04-24 In October 2016 the European Commission relaunched its plan to harmonize national income tax systems via the Common Consolidated Corporate Tax Base CCCTB perhaps the most ambitious reform of EU tax law ever attempted This timely book offers an early analysis of this important proposal and its implications covering issues such as the project's scope and main elements international considerations the relationship with OECD's base erosion and profit shifting BEPS initiative consolidation and anti abuse rules With carefully selected papers first presented at a January 2017 conference hosted by the Amsterdam Centre for Tax Law this volume focuses on such topics and issues as the following ways in which the proposed CCCTB is designed to preserve the competence of Member States to set their own tax rates reduction of the administrative burden for multinational companies incentives for research and development automatic cross border relief within the EU detailed analysis of the proposal's formula apportionment regime proposed new controlled foreign company CFC rules and interest limitation rule Because of the commitment of many Member States to keep their corporate income tax systems competitive on a stand alone basis the proposed CCCTB is enormously controversial This book provides authoritative insights into problems likely to arise and discusses the prospects of how the proposal is likely to be implemented Thus this book proves to be of immeasurable value to taxation policymakers practitioners and academics *Lessons of Tax Reform*, 1991-01-01 [Tax Reforms in EU Member States 2012](#) European Commission.
