## **Taxation In The Global Economy:**

**Taxation in the Global Economy** Assaf Razin, Joel Slemrod, 2008-04-15 The increasing globalization of economic activity is bringing an awareness of the international consequences of tax policy The move toward the common European market in 1992 raises the important question of how inefficiencies in the various tax systems such as self defeating tax competition among member nations will be addressed As barriers to trade and investment tumble cross national differences in tax structures may loom larger and create incentives for relocations of capital and labor and efficient and equitable income tax systems are becoming more difficult to administer and enforce particularly because of the growing importance of multinational enterprises What will be the role of tax policy in this more integrated world economy Assaf Razin and Joel Slemrod gathered experts from two traditionally distinct specialties taxation and international economics to lay the groundwork for understanding these issues which will require the attention of scholars and policymakers for years to come Contributors describe the basic provisions of the U S tax code with respect to international transactions highlighting the changes contained in the U S Tax Reform Act of 1986 explore the ways that tax systems influence the decisions of multinationals examine the effect of taxation on trade patterns and capital flows and discuss the implications of the opening world economy for the design of optimal international tax policy The papers will prove valuable not only to scholars and students but to government economists and international tax lawyers as well

**Taxation in a Global Economy** Andreas Haufler, 2001-08-23 The increasing international mobility of capital firms and consumers has begun to constrain tax policies in most OECD countries playing a major role in reforming national tax systems Haufler uses the theory of international taxation to consider the fundamental forces underlying this process covering both factor and commodity taxes as well as their interaction Topics include a variety of different international tax avoidance strategies capital flight profit shifting in multinational firms and cross border shopping by consumers Situations in which tax competition creates conflicting interests between countries are given particular consideration Haufler addresses the complex issue of coordination in different areas of tax policy with special emphasis on regional tax harmonization in the European Union Also included is a detailed introduction to recent theoretical literature

*Taxing Profit in a Global Economy* Michael P. Devereux, Alan J. Auerbach, Michael Keen, Paul Oosterhuis, Wolfgang Schön, John Vella, 2021-01-21 This book undertakes a fundamental review of the existing international

system of taxing business profit It steps back from the current political debates on how to combat profit shifting and how taxing rights over the profits of the digitalized economy should be allocated Instead it starts from first principles to ask how we should evaluate a tax on business profit and whether there is any good rationale for such a tax in the first place It then goes on to evaluate the existing system and a number of alternatives that have been proposed It argues that the existing system is fundamentally flawed and that there is a need for radical reform The key conclusion from the analysis is that there would be significant gains from a reform that moved the system towards taxing profit in the country in which a business made its sales to third parties That conclusion informs two proposals that are put forward in detail and evaluated the Residual Profit Allocation by Income RPAI and the Destination based Cash Flow Tax DBCFT The book is authored by group of economists and lawyers the Oxford International Tax Group chaired by Michael P Devereux It draws insights from both economics and law including economic theory empirical evidence on the impact of taxes and an examination of practical issues of implementation to assess the existing system and to consider fundamental reforms This book will be useful to tax policy makers tax professionals academics and anyone interested in tax policy

Peggy B. Musgrave, 2002 Income tax analysis extended to the arena of multinational investment The concept of tax equity among nations is introduced and developed The complex tax issues which arise in the case of cross border investment are addressed Taxing Profit in a Global Economy Michael P. Devereux, Alan J. Auerbach, Michael Keen, Paul Oosterhuis, John Vella, Wolfgang Schön, 2020-09-29 1 Introduction 2 Key issues in taxing profit 3 The current international tax system 4 Fundamental reform options 5 Basic choices in considering reform 6 Residual profit allocation by income 7 Destination based cash flow taxation Tax Sovereignty and the Law in the Digital and Global Economy Francesco Farri, 2020-09-27 This book discusses which is the most appropriate tax dimension to best manage the new horizons of the global and digital economy In this perspective the efficiency of the main models is examined and two fundamental proposals are put forth the first one aims at a coordination of the Destination Based approach with the role of some specific digital assets such as user data the second one is a framework for a possible futuristic tax phenomenon all internal to the world of the internet and not linked to traditional territorial States The compliance of these models with the constitutional principles that western democratic systems have affirmed over time in matters of taxation is then analyzed with particular regard to legal certainty consent to taxation and to the redistributive function of taxes A specific evaluation of the role of the European Union is carried out and the jurisprudence on financial interests of the Union and on State aids is analyzed and tackled in light of the Treaty on the Functioning of the European Union and of the tax sovereignty of member States The conclusion is that the model of the organization with a general political purpose from which modern States take their inspiration appears unailing for a tax project that would focus on the good and the growth of the person and of the social aggregations in which everyone lives A model that therefore deserves to be safeguarded although with new methods and instruments starting from a Destination
