Taxation Of Financial Services Under A Consumption Tax:

Taxation of Financial Services Under a Consumption Tax Peter R. Merrill, 1997 *Systems of General Sales Taxation* Robert F. W. van Brederode, 2009-01-01 This book gives a general overview of sales taxes and describes main characteristics of consumption taxation. It also provides an economic analysis of all the taxes covered and related tax issues such as tax shifting, tax incidence, the economic effect of reduced rates and exemptions, tax accumulation, regressivity, and the Laffer curve approach. In addition, it offers a tax policy approach in regard to specific economic sectors such as the treatment of small enterprises, financial services, and real property. The author further focuses on contrasts between US sales tax and European VAT in regard to e-commerce and the treatment of capital goods. The work also offers legal analysis in areas such as cross-border transactions and US constitutional restraints.

Taxation of Financial Intermediation Patrick Honohan, 2003 This book examines the options for and obstacles to successful financial sector tax reform both in terms of theoretical and practical aspects. Issues discussed include the design of optimal tax schemes, the role of imperfect information, and the links between taxation and saving, inflation, the income tax treatment of intermediary loan loss reserves, deposit insurance, VAT and financial transactions taxes, as well as current practice in the industrial world and case studies of distorted national systems. This is a co-publication of the World Bank and Oxford University Press.

Must Financial Services Be Taxed Under a Consumption Tax? Harry Grubert, James B. Mackie III, 2001 The taxation of financial services used by households has been a stumbling block in designing consumption taxes. We present a theoretical case for exempting from tax investment services, loan services, and insurance services. These services are not consumption items. Instead, they represent the cost of smoothing consumption across time as in the case of investment or loan services and across states of nature as in the case of insurance services. Since these services provide the funds used to purchase fully taxable consumption goods, these services should be expensed just as the cost of physical investment goods should be expensed.

Value Added Tax Alan Schenk, Victor Thuronyi, Wei Cui, 2015-02-09 This book integrates legal, economic, and administrative materials about the value added tax (VAT) to present the only comparative approach to the study of VAT law. The comparative presentation of this volume offers an analysis of policy issues relating to tax structure and tax base, as well as insights into how cases arising out of VAT disputes have been resolved. Its principal purpose is to provide comprehensive teaching tools, laws, cases, analytical exercises, and questions drawn from the experience of countries and organizations around the world. This second edition includes new VAT-related developments in Europe, Asia, Africa, and Australia and adds new chapters on VAT avoidance and evasion and on China's VAT. Designed to illustrate, analyze, and explain the principal theoretical and operating features of value added taxes, including their adoption and implementation, this book will be an invaluable resource for tax practitioners and government officials.
