Taxation Of Mineral Rents:

Taxation of Mineral Rents Ross Garnaut, Anthony Clunies Ross, Anthony Ian Clunies Ross, 1983 How should governments manage their countries mineral and oil gas resources This book deals with the relationships between governments and mining companies governments participation in mining enterprises stabilization in the face of fluctuating mineral revenue and possible forms for tax systems and their administration Petroleum Rent Collection Around the World Alexander G. Kemp, Institute for Research on Public Policy, 1987 *The Taxation of Petroleum and Minerals* Philip Daniel, Michael Keen, Charles McPherson, 2010-04-15 Oil gas and mineral deposits are a substantial part of the wealth of many countries not least in developing and emerging market economies Harnessing some part of that wealth for fiscal purposes is critical for economic development in few areas of economic life are the returns to good policy so large or mistakes so costly *Land Taxes and Mineral Right Duties from a Surveyor's and Valuer's Standpoint* Thomas Moffet, 1910

State Taxation of Mineral Rents, Regional Economic Development and Income Distribution James Love, Nancy Barbe, Belden Hull Daniels, Western Governors Policy Office, 1982 *Evaluation of Taxes and Revenues From the Energy Sector in the Baltics, Russia, and Other Former Soviet Union Countries* Mr. Dale F. Gray, 1998-03-01 This paper examines the level and structure of fiscal revenues from the Baltics Russia and other former Soviet Union countries BRO energy sector and suggests reforms in energy tax policy Revenues from the oil and gas sectors are about half the level that might be expected from international comparisons Low oil revenues result from infrastructure constraints on oil exports weak tax administration and inappropriate tax structures Low gas revenues are due to low statutory tax rates a tax structure that does not capture monopoly or resource rents and weak tax administration Taxation of oil products could be increased *State Governance of Mining, Development and Sustainability* Tracy-Lynn Field, 2019 States in mineral rich jurisdictions must promote mining as a development industry just as they must protect people and environment from the worst excesses of extractivism State Governance of Mining Development and Sustainability explores how the State s role in facilitating a developmental and sustainable mining industry has been defined In doing so this astute book considers the impact of the policies and laws of mineral rich States themselves multilateral international governance institutions industry associations and environmental justice advocates in the areas of property relations mineral taxation environmental management and mine closure **Mining Taxation** Eric Lilford, Pietro Guj, 2020-08-30 This book examines existing mineral fiscal policies covering income taxation royalties free carried and participative community and government interests and also highlights the impacts of these policies on the feasibility of mineral projects as well as on revenue and other benefits to the State While publications already exist on the subject matter they have invariably approached the topic primarily from a Government standpoint rather than the mining industry This book aims to provide a balance in this debate by comparing the financial outcomes gained or foregone by both Government and industry under different policy regimes The discussions are supported by quantitative

examples to more clearly articulate the potential outcomes and better inform future fiscal policy decisions

Sustainable Development in Mineral Economies Richard M. Auty, Raymond F. Mikesell, 1998 The mineral economies comprise approximately one fifth of developing countries They face special problems in achieving sustainable development and have as a group been less successful than resource deficient neighbours This book examines the apparent paradox detailing the current problems facing the mineral economies and the future policies necessary to overcome these problems Nine countries are studied Botswana Chile Colombia Indonesia Jamaica Namibia Papua New Guinea Peru and Trinidad and Tobago The authors argue that the key factor is not the sustainability of the mineral production that initially generates growth but the maintenance of the economic and social conditions for sustaining that growth They draw upon recent progress in environmental and natural resource accounting to show how this can be achieved and also assess the socio political factors that often constrain sustainable development

Redesigning Petroleum Taxation Emre Üşenmez, 2018-10-15 Since its inception some 40 years ago petroleum specific taxation in the UK has been subject to numerous modifications Often these modifications were brought into place not only to sufficiently incentivise the investors but also to capture a fair share for the government However it is evident from the frequency of changes that finding the right balance between these two aims is no easy matter Such a balance and the consequent fiscal stability is necessary for the long term relationship between the parties to endure to their mutual benefit Still it does not take much for one or other party to feel that they are out of balance As a consequence one party feels that the other party is taking an undue proportion of the value generated and that they are losing out Yet achieving that balance and fiscal stability is possible To understand this possibility this book first clarifies what is meant by sufficient incentivisation and fair share before developing a new fiscal system that manages this balance and stability Such clarification yields objective criteria against which to assess not only the existing regime but also the newly proposed regime This approach is further complemented by the critical analysis of the fiscal legislative framework and the evaluation of the legal positions of specific contractual elements and mechanisms found within that framework This latter analysis is important in order to reduce the legal uncertainty such elements may create which can otherwise lead to further reactive amendments and revisions to the fiscal regime in the future

Progressive Taxation of Extractive Resources as Second-Best Optimal Policy Jean-François Wen, 2018-06-13 The paper provides a critical review of the literature on the concept of progressivity in the taxation of petroleum and mineral resources and offers a fresh perspective on its purpose and measurement Regressive taxes such as royalties exist to satisfy policy objectives other than revenue maximization such as achieving early revenues while rent based or profit sensitive fiscal instruments must be designed with progressive marginal rates to maximize government revenues Hence the emphasis should be placed on tax rate progression of the direct taxation of profit or rent rather than progressivity in the overall government take However as regressive taxes by their very nature tend to be distortionary the optimal degree of progression in the rent or profit tax rates must take these distortions into

account The central ideas are illustrated with a simple analytical model in which a second best optimal tax rate schedule on profit is characterized in the presence of the tax distortions caused by the regressive taxes Some practical implications of the analysis are discussed The Oxford Handbook of International Investment Law Peter Muchlinski, Federico

Ortino, Christoph Schreuer, 2008 The Oxford Handbook series is a major new initiative in academic publishing Each volume offers an authoritative and state of the art survey of current thinking and research in a particular subject area Specially commissioned essays from leading international figures in the discipline give critical examinations of the progress and direction of debates Oxford Handbooks provide scholars and graduate students with compelling new perspectives upon a wide range of subjects in the humanities and social sciences The Oxford Handbook of International Investment Law aims to provide the first truly exhaustive account of the current state and future development of this important and topical field of international law The Handbook is divided into three main parts Part One deals with fundamental conceptual issues Part Two deals with the main substantive areas of law and Part Three deals with the major procedural issues arising out of the settlement of international investment disputes The book has a policy oriented introduction setting the more technical chapters that follow in their policy environment within which contemporary norms for international foreign investment law are evolving The Handbook concludes with a chapter written by the editors to highlight the major conclusions of the collection to identify trends in the existing law and to look forward to the future development of this field Hand-book of Income Tax Law and Practice, with an index to the Acts of Parliament-1842 to the present time Charles SENIOR (Surveyor of

Taxes.), 1863 **Mining and Energy Law** Samantha Hepburn, 2023-09-21 Mining and Energy Law is a thorough examination of the contemporary mining and energy sectors in Australia It explores the law governing the current mix of sources utilised in the Australian energy sector from petroleum and natural gas to renewable energy sources including wind and solar power *Research Handbook on Transnational Corporations* Alice de Jonge, Roman Tomasic, 2017-01-27

Transnational corporations TNCs have moved to the forefront of regulatory governance both within states and in the international arena The Research Handbook on Transnational Corporations provides expert background commentary and up to date insights into regulatory frameworks impacting on TNCs at global industry and national levels Written by global experts in their field this unique collection of essays provides in depth understanding of how the forces of globalisation affect the world's largest corporations and how those corporations in turn shape globalisation **Hand-book of Income Tax Law & Practice** Charles Senior, 1863

Governing Natural Resources for Africa's Development Hany Gamil Besada, 2016-09-13 Bringing together some of the world's leading thinkers and policy experts in the area of natural resource governance and management in Africa this volume addresses the most critical policy issues affecting the continent's ability to manage and govern its precious resources The narrative of the book is solutions driven as experts weigh on specific issues within the context of Africa's natural resource governance and offer appropriate policy recommendations on how to best manage the

continent's resources This is a must read for government policy makers in industrialized economies and more importantly in Africa and emerging economies as well as for academic researchers working in the field extractive companies operating on the continent extractive industry and trade associations and multilateral and donor aid institutions

Explanation of Proposed Income Tax Treaty Between the United States and Canada, 1981 **Natural Resource Revenues** Anthony Scott, 1976 Debate on the question of who should receive the surplus revenue generated by natural resource exploitation Ottawa or the provinces is usually carried on in terms of history politics custom law social values and environmental considerations This collection of essays presents analyses of the question from the economist's point of view The essays fall into three groups In the first of these the authors examine the taxation of the mining and energy industries and show how the method of taxation chosen by different levels of government federal or provincial may be non neutral distorting private output and timing decisions The second group consists of careful case studies of the effects of particular natural resource taxation measures the third focuses directly on the question of provincial and federal entitlement to resource revenues Although arguments are advanced for linking the right to tax to the responsibility for management and control at present vested in the provinces most of the contributors would agree that the provinces should be regarded as stewards and bailiffs not landlords as rent collectors and managers not rentiers and owners
