Taxodiaceous Conifers From The Upper Cretaceous Of Sweden:

Taxodiaceous Conifers from the Upper Cretaceous of Sweden Vijayalakshmi Srinivasan, Else Marie Friis, 1989 Biologiske skrifter Kongelige Danske videnskabernes selskab, 1939 Flora of the Sudan-Uganda Border Area East of Protocols for Micropropagation of Woody Trees and Fruits S.Mohan Jain, H. the Nile Ib Friis, Kaj Vollesen, 1998 Häggman, 2007-09-18 Micropropagation has become a reliable and routine approach for large scale rapid plant multiplication which is based on plant cell tissue and organ culture on well defined tissue culture media under aseptic conditions A lot of research efforts are being made to develop and refine micropropagation methods and culture media for large scale plant multiplication of several number of plant species However many forest and fruit tree species still remain recalcitrant to in vitro culture and require highly specific culture conditions for plant growth and development The recent challenges on plant cell cycle regulation and the presented potential molecular mechanisms of recalcitrance are providing excellent background for understanding on totipotency and what is more development of micropropagation protocols For large scale in vitro plant production the important attributes are the quality cost effectiveness maintenance of genetic fidelity and long term storage The need for appropriate in vitro plant regeneration methods for woody plants including both forest and fruit trees is still overwhelming in order to overcome problems facing micropropagation such as somaclonal variation recalcitrant rooting hyperhydricity polyphenols loss of material during hardening and quality of plant material Moreover micropropagation may be utilized in basic research in production of virus free planting material cryopreservation of endangered and elite woody species applications in tree breeding and reforestation Fossilium Catalogus. II. Plantae. Pars 102, 1976 Flowers and Angiosperm Evolution Else Marie Friis, Peter R. Crane, Kaj Raunsgaard Pedersen, 2011-08-18 The recent discovery of diverse fossil flowers and floral organs in Cretaceous strata has revealed astonishing details about the structural and systematic diversity of early angiosperms Exploring the rich fossil record that has accumulated over the last three decades this is a unique study of the evolutionary history of flowering plants from their earliest phases in obscurity to their dominance in modern vegetation The discussion provides comprehensive biological and geological background information before moving on to summarise the fossil record in detail Including previously unpublished results based on research into Early and Late Cretaceous fossil floras from Europe and North America the authors draw on direct palaeontological evidence of the pattern of angiosperm evolution through time Synthesising palaeobotanical data with information from living plants this unique book explores the latest research in the field highlighting connections with phylogenetic systematics structure and the biology of extant angiosperms The Evolution of Plant Physiology Alan R. Hemsley, Imogen Poole, 2004-02-05 Coupled with biomechanical data organic geochemistry and cladistic analyses utilizing abundant genetic data scientific studies are revealing new facets of how plants have evolved over time This collection of papers examines these early stages of plant physiology evolution by describing the initial physiological adaptations necessary for survival as upright structures in a dry terrestrial environment The Evolution of Plant Physiology also encompasses physiology in its broadest sense to include biochemistry histology mechanics development growth reproduction and with an emphasis on the interplay between physiology development and plant evolution Contributions from leading neo and palaeo botanists from the Linnean Society Focus on how evolution shaped photosynthesis respiration reproduction and metabolism Coverage of the effects of specific evolutionary forces variations in water and nutrient availability grazing pressure and other environmental variables

Ecology of the Southern Conifers Neal J. Enright, Robert S. Hill, 1995 This is a specialist book intended for libraries and specializing scientists. The expansion of angiosperms flowering plants with enclosed seeds and the decline of gymnosperms plants with seeds processed by seed vessels is one of the most significant phytogeographic processes in the history of the earth Despite this massive change in the earth's flora on the geological timescale no fewer than 500 species of gymnosperms excluding cycads continue to survive Major northern hemisphere taxa such as pinus abies and picea are prominent in the landscape and have been the subjects of much scientific study **A Bibliography of Conifers** Aljos Farjon, 2005 The new edition of this work first published in 1990 includes 3 787 references to the published literature To make it far more accessible many more general titles have been added including coverage of Araucariaceae Cupressaceae and Pinaceae and subjects related to their taxonomy Palaeobiology II Derek E. G. Briggs, Peter R. Crowther, 2008-04-15 Palaeobiology A Synthesis was widely acclaimed both for its content and production quality Ten years on Derek Briggs and Peter Crowther have once again brought together over 150 leading authorities from around the world to produce Palaeobiology II Using the same successful formula the content is arranged as a series of concise articles taking a thematic approach to the subject rather than treating the various fossil groups systematically This entirely new book with its diversity of new topics and over 100 new contributors reflects the exciting developments in the field including accounts of spectacular newly discovered fossils and embraces data from other disciplines such as astrobiology geochemistry and genetics Palaeobiology II will be an invaluable resource not only for palaeontologists but also for students and researchers in other branches of the earth and life sciences Written by an international team of recognised authorities in the field Content is concise but informative Demonstrates how palaeobiological studies are at the heart of a range of scientific themes A Monograph of Cupressaceae and Sciadopitys Aljos Farjon, 2005 A Monograph of Cupressaceae and Sciadopitys All species from these two families are described with information on nomenclature types distribution ecology conservation cited specimens taxonomic notes and distribution maps Introductory chapters deal with history morphology and anatomy phylogeny and evolution and distribution

Paleobotany Edith L. Taylor, Thomas N. Taylor, Michael Krings, 2009-01-21 This book provides up to date coverage of fossil plants from Precambrian life to flowering plants including fungi and algae It begins with a discussion of geologic time how organisms are preserved in the rock record and how organisms are studied and interpreted and takes the student through all the relevant uses and interpretations of fossil plants With new chapters on additional flowering plant families

paleoecology and the structure of ancient plant communities fossil plants as proxy records for paleoclimate new methodologies used in phylogenetic reconstruction and the addition of new fossil plant discoveries since 1993 this book provides the most comprehensive account of the geologic history and evolution of microbes algae fungi and plants through time Major revision of a 1993 classic reference Lavishly illustrated with 1 800 images and user friendly for use by paleobotanists biologists geologists and other related scientists Includes an expanded glossary with an extensive up to date bibliography and a comprehensive index Provides extensive coverage of fungi and other microbes and major groups of land plants both living and extinct Excerpta Botanica ,1994 External Morphology and Larval Development of Derocheilocaris Remanei Delamare-Deboutteville & Chappuis, 1951 (Crustacea, Mystacocarida), with a Comparison of Crustacean Segmentation and Tagmosis Patterns Jørgen Olesen, 2001 Proceedings of the 4th European Palaeobotanical and Palynological Conference G. F. W. Herngreen, 1997 Comparative Ethnobotanical Studies of the Amerindian Groups in Coastal Ecuador Anders S. Barfod, Lars Peter Kvist, 1996 Biologiske skrifter ,1939 Anthropological Field Studies .1971 Mededelingen Nederlands Instituut Voor Toegepaste Geowetenschappen TNO. Netherlands.
