Teach Your Kids how to Draw Ali Alhito, 2020-09-16 A fun way to spend time with your child Completing an art project at home is a great way to have fun with your child For preschoolers play is their work and art is a great form of play Play is activity centered around using your imagination and creativity to make believe As you look at or create art your body releases endorphins which causes you to relax and enjoy your activity Creating art at home is a great way to spend time with your child as you talk and explain the world around them Historical perspective For the majority of history art and craft was taught by parents as a way to make useful things for survival In the Bible you can find numerous jobs relating to art such as carpenter embroider architect engraver gardener harpist poet potter tent maker and writer These artisans a worker in a skilled trade making things by hand would use their creativity and hands to make something beautiful for others to use and enjoy Formal art education wasn't seen in schools until after the industrial revolution in the 1920's An organized education system was developed in response to a rise in promoting moral and civic virtue of society This history shows how integral art is to the artist as well as to the greater good of the whole of society Technology and distractions As you know children love games movies and cartoons This media consumption used to be focused on the television but now we have more ways to watch and on an assortment of screen sizes I agree technology makes things easier faster and sometimes less stressful I also

believe they make things more complicated and rob children of their creativity by giving them permission to be passive and entertained I have seen a lot of drawing apps marketed to children that give a poor representation of drawing Drawing is tactile and you need to feel smell and hear as you draw This can never be replicated in a digital format *Teaching Your Child with Love and Skill* Joyce Show,2012-04-15 Parents of children with autism can often feel out of their depth when it comes to nurturing their child s learning and development This book helps parents to make sense of the baffling array of educational interventions available showing how to adapt different strategies to meet the specific needs of their child including those with moderate to severe autism Guided by love faith and unwavering resolve Joyce Show offers practical advice based on her experiences as both a mother and a physician She takes the reader by the hand through all the steps of cognitive social and emotional development from initial engagement to abstract thinking and provides straightforward primers for popular interventions such as Floortime and Applied Behavior Analysis ABA Parents will learn how to motivate play build up communication deal with challenging behaviors and teach important everyday life skills while growing in a trusting relationship with their child This book offers encouragement and guidance to the parents of any child on the autism spectrum whether high or low functioning as well as the teachers therapists family members and friends who support them
