Teacher Politics The Influence Of Unions:

Teacher Politics Maurice R. Berube, 1988-05-16 In a landmark contribution to the education literature Berube examines the political activities of the two teachers unions the National Education Association NEA and the American Federation of Teachers AFL CIO AFT during the last three decades The first scholarly study of its kind Teacher Politics argues that teachers unions have become the most powerful political constituency in the nation Through effective lobbying arms seeking favored legislation and political machines supporting local state and national candidates with manpower and money this force of 2 5 million teachers is changing American educational politics As Berube convincingly demonstrates teacher unions have been reasonably effective in their political and legislative endeavors and through their enormous resources have become the chief representatives of education in American politics *The Politics of the Pta* Charlene K. The Color of School Reform Jeffrey R. Henig, Richard C. Hula, Marion Orr, Desiree S. Pedescleaux, 2001-01-22 Why is it so difficult to design and implement fundamental educational reform in large city schools in spite of broad popular support for change How does the politics of race complicate the challenge of building and sustaining coalitions for improving urban schools These questions have provoked a great deal of theorizing but this is the first book to explore the issues on the basis of extensive solid evidence Here a group of political scientists examines education reform in Atlanta Baltimore Detroit and Washington D C where local governmental authority has passed from white to black leaders The authors show that black administrative control of big city school systems has not translated into broad improvements in the quality of public education within black led cities Race can be crucial however in fostering the broad civic involvement perhaps most needed for school reform In each city examined reform efforts often arise but collapse partly because leaders are unable to craft effective political coalitions that would commit community resources to a concrete policy agenda What undermines the leadership according to the authors is the complex role of race in each city First public authority does not guarantee access to private resources usually still controlled by white economic elites Second local authorities must interact with external actors at the state and national levels who remain predominantly white Finally issues of race divide the African American community itself and often place limits on what leaders can and cannot do Filled with insightful explanations together with recommendations for policy change this book is an important component of the debate now being waged among researchers education activists and the community as a whole **Interest Groups in U.S. Local Politics** Sarah Anzia, 2023-09-15

Palonsky, Mary Rose McCarthy, 2020-08-12 Critical Issues in Education examines three questions that are at the core of the education debate in the United States What interests should schools serve What knowledge should schools teach How do we develop the human environment of schools When answering these queries the authors advocate the use of critical thinking which includes dialogue and dialectic reasoning Dynamic and interactive dialogue requires listening and assessment while dialectic stimulates the development of a creative response that encompasses both sides of an issue When applied these approaches engender an informative and stimulating discussion In order to explore the depth of current educational issues the Ninth Edition considers 15 topics providing supporting evidence and reasoning for two divergent views These issues include violence in schools the role of technology gender equity multiculturalism inclusion and disability and school choice Both civic and professional discussions regarding improvements will have consequences for students teachers and society As a result educational views and the social landscape in which they reside deserve critical study Teachers' Unions and the Politics of Education in Japan Robert W.
