Teachers and Students Carnegie Commission on Higher Education, 1975 **Teachers and Students** Carnegie Commission on Higher Education, 1975 **Higher Education** , 1981 **Resources in Women's Educational Equity: Special Issue** , 1979 **Daring to Educate** Yolanda L. Watson, Sheila T. Gregory, 2023-07-03 While President Emerita Johnnetta B Cole is credited with propelling Spelman College the oldest historically Black women's college to national prominence little is generally known about the strong academic foundation and legacy she inherited Contrary to popular belief the first four presidents of Spelman including its two co founders were White women who led the early development of the College armed with the belief that former slaves and free Black women should and could receive a college level education This book presents the history of Spelman's foundation through the tenure of its fourth president Florence M Read which ended in 1953 This compelling story is brought up to date by the contributions of Spelman's current president Beverly Daniel Tatum and by Johnnetta B Cole The book chronicles how the vision each of these women presidents and their response to changing social forces both profoundly shaped Spelman's curriculum and influenced the lives and minds of thousands of young Black women The authors trace the evolution of Spelman from its beginning when the founders aware of the limited occupations open to its graduates strove to uplift the Black race by providing an academic education to disenfranchised Black women while also providing training for available careers to the fifties when the college became an exemplar of liberal arts education in the South This book fills a void in the history of Black women in higher education It will appeal to a wide readership interested in women's studies Black history and the history of higher education in general *Good Teaching in Higher Education* Immanuel Ulrich, 2023-08-23 How do I plan my course How can I inspire students How do I present myself How do I want to teach How do I test correctly What teaching methods are there Due to the lack of comprehensive university didactic training teachers too often have to answer these and many other questions for themselves This book is intended to counteract this and presents practical tips on good university teaching for all disciplines based on the current state of research **Involvement in Learning** National Institute of Education (U.S.). Study Group on the Conditions of Excellence in American Higher Education, 1984 Teaching and Learning in Higher Education Beatrice L. Bridgall, 2013-08-28 Concerns with how students are taught and whether and how they learn has become particularly salient in higher education This is evident in growing awareness of increases in time to degree and declines in attainment rates for many students including those who are underrepresented in our nation's community and public and private colleges and universities It is also demonstrated vis vis recent findings that more than a third of college students evinced no noticeable improvement in critical thinking writing and complex reasoning skills after four years as an undergraduate These findings suggest that while a focus on access to and participation in the nation's colleges and universities remain a prominent goal it is no longer sufficient given persistent disparities in post secondary student learning There are a few models however from which we can

distill a set of strategies for promoting not only high achievement but also retention and completion rates This book examines three such models in higher education the Meyerhoff Scholars Program at the University of Maryland Baltimore County the Opportunity Programs at Skidmore College in Saratoga Springs New York and the Premedical Program at Xavier University in New Orleans with a proven record of student achievement and completion **Resources in Education** ,2000-10

Chan,2023-06-29 This is an open access book With the progress of social civilization social science and its research are becoming more and more important Theoretically and practically the study of social phenomena and social problems and the development of prosperous social sciences are the eternal themes of human beings At present social science research and its results can hardly meet the needs of social development especially the unscientific evaluation of social science results which has aroused great concern from all walks of life and has produced dirt and questions on social science thus affecting the proper development of social science Max Weber once said that the most important function of social science in modern times is to keep people clear headed and to resist the delusions of prophetic legislators Humanities and arts are the process of perceiving realizing thinking manipulating and expressing objective or subjective objects through capturing and excavating feeling and analyzing integrating and applying or displaying the stage results in the form obtained through feeling seeing hearing smelling touching The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions And by reacting to today s increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc *Statistical Reference Index* ,1990 [Asian Americans in Higher Education: Charting New Realities](#) Yoon K. Pak,Dina C. Maramba,Xavier J. Hernandez,2014-03-25 The Asian American and Pacific Islander AAPI population continues to obfuscate the discourse on diversity and higher education institutions The historical and contemporary experiences of AAPIs in higher education clearly indicate that their presence has influenced and reinforced the importance of diversity in educational environments To contextualize AAPIs participation in postsecondary education this monograph provides A historical overview of the model minority stereotype The affirmative action debate and AAPIs Their involvement in the education pipeline A discussion of their experiences in college Implications

for future research practice and policy are further discussed Educators administrators faculty policy makers and researchers who are concerned with diversity issues and the AAPI population will find this monograph an engaging and valuable resource

Building Teaching Capacities in Higher Education Alenoush Saroyan, Mariane Frenay, 2023-07-03 This book is the culmination of three years work by teams from eight institutions in five different European and North American countries The teams included faculty developers professors and graduate students interested in developing and disseminating a more profound understanding of university level pedagogy The purpose of the project was first to conceptualize what an internationally appropriate formal academic program for faculty development in higher education might look like taking into

account differing national contexts from national standards for faculty development U K and Scandinavia almost universal institutional support North America to virtually no activities France The intention was to create and nurture a community of practice enriched and informed by a range of expertise and different higher education traditions cultures and languages To do so the book begins with a section of five case studies that describe current practice in Belgium Canada Denmark France and Switzerland The second purpose was to define a common curriculum or core course with common foundations for faculty and graduate students based on a distributed learning model The final section of the book presents a concrete concept map used to define the curriculum and to educational developers with useful tool for furthering their work and explains the rationale for redefining faculty development as educational development This book offers practitioners around the world a framework and model of educational development that can serve a number of purposes including professional development monitoring and assessment of effectiveness and research as they seek to meet increasing demands for public accountability For North American readers it offers insight into the vision and aims of the Bologna Process with which they may need to engage to maintain international competitiveness *American Educational Digest* ,1928
