schools While Religious filter their teachings through their own religious training and emphasize the mission and charisma of Catholic education lay staff often lack the same intensely religious experiences to bring to the teaching learning environment This qualitative interview study explored the influence that a series of spirituality and virtue seminars had on lay teachers perceptions of the Catholic school and character education *Formation and Development for Catholic School Leaders: The principal as educational leader* Maria J. interested in what is happening within Catholic schools today **International Handbook of the Religious, Moral and Spiritual Dimensions in Education** Marian de Souza, Gloria Durka, Kathleen Engebretson, Robert Jackson, Andrew McGrady, 2007-06-04 Traditionally spirituality has resided and been contained within religious frameworks but while the links between the two areas are still acknowledged by many in the contemporary world spirituality is perceived by some as an aspect of human life that is distinct from religion Consequently many are searching for meaning within and without religious traditions today and seeking answers to ethical and moral questions that have been generated by the knowledge and technological explosion One outcome is the renewed interest in the religious spiritual and moral dimensions of education throughout the life cycle This International Handbook presents the research and professional practice of scholars who are daily engaged in the consideration of these dimensions in education The result is a collection of essays which reflects the discipline in all of its internationality as it is today Embedded within the chapters is also an agenda for the future where the religious moral and spiritual dimensions in education are proposed as an exciting and challenging way forward for educators at all levels in society As well it offers a vision for the emergence of a peaceful and just world *Contemporary Challenges for Religious and Spiritual Education* Arniika Kuusisto, Terry Lovat, 2017-10-02 From being on the margins of scholarly debate for much of the past century and a half religion is being recognized once again as an area of concern for scholars politicians and public policy makers and thus the role of religious and spiritual education has taken on a new importance Apart from its socio political ramifications the place of religiousness and spirituality in the make up of individuals has been given renewed prominence through updated brain science and neuroscientists regularly refer to elements of this brain science in terms such as spiritual intelligence and even mystical consciousness This book explores many of the new directions being taken in the field of religious and spiritual education as new developments challenge the priorities of formal education and open up new avenues for incorporating religion and spirituality into the modern curriculum It asks whether the educational aims of teachers should be focused on specifically personal development or whether religious education should be used to develop understanding of more global and social issues such as citizenship conflict and ethics The book also addresses neuroscientific insights which suggest a need to engage with cognition and emotion in order to create a rich learning environment something to which a particularly contested subject area like religion and spirituality is well placed to contribute This book was originally published as a special issue of the Journal of Beliefs Values **Research in Education** ,1972
