Readers will be able to follow the themes and strands and see how their work contributes to the development of the field. **Language and the Joint Creation of Knowledge** draws on the most prominent writing of Neil Mercer, covering his ground-breaking and critically acclaimed work on the role of talk in education and on the relationship between spoken language and cognition. The text explores key themes relating theoretical ideas to research evidence and to practical educational situations that improve children's lives. Offering students and researchers a clear, accessible and up-to-date account of a sociocultural perspective on the relationship between spoken language and cognition, it explains one of the key themes in Neil Mercer's work: that humans have uniquely evolved the capacity to think together or interthink.
