2050 G.J. Nabuurs, R. Päivinen, A. Pussinen, M.J. Schelhaas, 2021-11-22 In Europe forest policy discussions are moving towards a European Union wide strategy This will further strengthen the relations between the European countries in the field of forests and forest management European wide forest planning and decision making require that policy makers have insight in the long term development of European forests under alternative regimes The European Forest Information Scenario Model EFISCEN was used to make projections of the development of the European forests under four different scenarios This book addresses the consequences of each scenario for wood production biodiversity and the environmental functions of the forest The results provide policy makers with a challenge of whether to intervene in the ongoing trend of

build up of growing stock and whether to choose between enhancing biodiversity increasing the use of domestically produced wood products or to combine them **Endangered Species Act Reauthorization** United States.
