The Formation of a Medieval Church Maureen C. Miller, 2018-09-05 In this provocative account Maureen Miller challenges traditional explanations of the process that changed the nature of religious institutions and religious life itself in the diocese of Verona during the early and central Middle Ages Building on substantial archival research she shows how demographic expansion economic development and political change helped transform religious ideals and ecclesiastical institutions into a recognizably medieval church

The Oxford Handbook of Medieval Christianity John H. Arnold, 2014-08-21 The Oxford Handbook of Medieval Christianity takes as its subject the beliefs practices and institutions of the Christian Church between 400 and 1500AD It addresses topics ranging from early medieval monasticism to late medieval mysticism from the material wealth of the Church to the spiritual exercises through which certain believers might attempt to improve their souls Each chapter tells a story but seeks also to ask how and why Christianity took particular forms at particular moments in history paying attention to both the spiritual and otherworldly aspects of religion and the material and political contexts in which they were often embedded This Handbook is a landmark academic collection that presents cutting edge interpretive perspectives on medieval religion for a wide academic audience drawing together thirty key scholars in the field from the United States the UK and Europe Notably the Handbook is arranged thematically and focusses on an analytical rather than narrative approach seeking to demonstrate the variety change and complexity of religion throughout this long period and the numerous different ways in which modern scholarship can approach it While providing a very wide ranging view of the subject it also offers an important agenda for further study in the field

Popes and Antipopes: The Politics of Eleventh Century Church Reform Mary Stroll, 2011-12-09 A revolution shook the Christian world in the second half of the eleventh century Many eminent historians point to Hildebrand later Gregory VII 1073 1085 as the prime mover of this movement that aspired to free the Church from secular entanglements and to return it to its state of paleochristian purity I see the reform from the perspective of much wider developments such as the split between the Greek and the Latin Churches and the Norman infiltration of Southern Italy Concentrating on the popes and the antipopes I delve into the character and motivations of the important personae and do not see the movement as a smooth line of progress I see the outcome as reversal of power of what had been a strong empire and a weak papacy

Handbook of Medieval Culture. Volume 3 Albrecht Classen, 2015-08-31 A follow up publication to the Handbook of Medieval Studies this new reference work turns to a different focus medieval culture Medieval research has grown tremendously in depth and breadth over the last decades Particularly our understanding of medieval culture of the basic living conditions and the specific value system prevalent at that time has considerably expanded to a point where we are in danger of no longer seeing the proverbial forest for the trees The present

Venarde, 2018-05-31 In this engaging work Bruce L Venarde uncovers a largely unknown story of women's religious lives and puts female monasticism back in the mainstream of medieval ecclesiastical history To chart the expansion of nunneries in France and England during the central Middle Ages he presents statistics and narratives to describe growth in broad historical contexts with special attention to social and economic change Venarde explains that in the years 1000-1300 the number of nunneries within Europe grew tenfold In the eleventh and twelfth centuries religious institutions for women developed in a variety of ways mostly outside the self-conscious reform movements that have been the traditional focus of monastic history Not reforming monks but wandering preachers bishops and the women and men of local petty aristocracies made possible the foundation of new nunneries In times of increased agrarian wealth decentralization of power and a shortage of potential spouses many women decided to become nuns and proved especially adept at combining spiritual search with practical acumen This era of expansion came to an end in the thirteenth century when forces of regulation and new economic realities reduced radically the number of new nunneries Venarde argues that the factors encouraging and inhibiting monastic foundations for men and women were much more similar than scholars have previously assumed

Noble Lord, Good Shepherd Anna Trumbore Jones, 2009 The bishop was a figure of unparalleled importance in the tenth and eleventh centuries as he married the advantages of his noble birth to the sacramental and pastoral role of bishop drawing upon the resultant range of powers to intervene in all areas of life Scholarship on the episcopate in this period however has tended to cluster around two themes the role of bishops in the fragmentation of the Carolingian Empire and the critiques of these bishops levied by certain church reformers This book moves beyond these subjects and examines the full scope of bishops' activities in southwest France as they ruled their cathedrals interacted with lay powers patronized religious communities and wrestled with the complex nature of their office *The Formation of a Medieval Church* Maureen Catherine Miller, 1993 In this provocative account Maureen Miller challenges traditional explanations of the process that changed the nature of religious institutions and religious life itself in the diocese of Verona during the early and central Middle Ages Building on substantial archival research she shows how demographic expansion economic development and political change helped transform religious ideals and ecclesiastical institutions into a recognizably medieval church **In the Shadows of Reform** William Linden North, 1998 **Parergon**, 1993
