John Warden and the Renaissance of American Air Power John Andreas Olsen, 2007 Dr John Andreas Olsen has written an insightful compelling biography of retired U S Air Force colonel John A Warden III the brilliant but controversial air warfare theorist and architect of Operation Desert Storm's air campaign Warden's radical ideas about air power's purposes and applications promulgated at the expense of his own career sparked the ongoing revolution in military affairs Legendary in defense circles Warden is also the author of *The Air Campaign Planning for Combat* republished by Brassey's Inc in 1989 Presenting both the positives and negatives of Warden's personality and impact in this objective portrait Olsen offers a trenchant analysis of his revolutionary ideas and great accomplishments

Strategic Warfare in Cyberspace Gregory J. Rattray, 2001 A comprehensive analysis of strategic information warfare waged via digital means as a distinct concern for the United States and its allies In the information age information systems may serve as both weapons and targets Although the media has paid a good deal of attention to information warfare most treatments so far are overly broad and without analytical foundations In this book Gregory Rattray offers a comprehensive analysis of strategic information warfare waged via digital means as a distinct concern for the United States and its allies Rattray begins by analyzing salient features of information infrastructures

and distinguishing strategic information warfare from other types of information based competition such as financial crime and economic espionage He then establishes a conceptual framework for the successful conduct of strategic warfare in general and of strategic information warfare in particular Taking a historical perspective he examines U S efforts to develop air bombardment capabilities in the period between World Wars I and II and compares them to U S efforts in the 1990s to develop the capability to conduct strategic information warfare He concludes with recommendations for strengthening U S strategic information warfare defenses

Strategic Air Power in Desert Storm John Andreas Olsen,2013-11-05 In response to the Iraqi invasion of Kuwait on the second of August 1990 a small group of air power advocates in the Pentagon proposed a strategic air campaign Operation Desert Storm designed to drive the Iraqi army from Kuwait by a sustained effort against the major sources of Iraqi national power John Andreas Olsen provides a coherent and comprehensive examination of the origins evolution and implementation of this campaign His findings derive from official military and political documentation interviews with United States Air Force officers who were closely involved with the planning of the campaign and Iraqis with detailed knowledge and experience of the inner workings of the Iraqi regime

The Future: Warfare, military forces and technology ,1993 *Airpower Applied* John Andreas Olsen,2017-05-15 Airpower Applied reviews the evolution of airpower and its impact on the history of warfare Through a critical examination of twenty nine case studies in which various U S coalitions and Israel played significant roles this book offers perspectives on the political purpose strategic meaning and military importance of airpower By comparing and contrasting more than seventy five years of airpower experience in very different circumstances readers can gain insight into present day thinking on the use of airpower and on warfare The authors all experts in their fields demystify some of airpower s strategic history by extracting the most useful teachings to help military professionals and political leaders understand what airpower has to offer as a continuation of politics by other means The case studies emphasize the importance of connecting policy and airpower operational effectiveness cannot substitute for poor statecraft As the United States its allies and Israel have seen in their most recent applications of airpower even the most robust and capable air weapon can never be more effective than the strategy and policy it is intended to support
