 studies try to understand how people assume identities and how they perceive reality In this perspective narration as a basic

form of cognitive processing is a fundamental cultural technique Narrations provide the coherence temporal organization and semantic integration that are essential for the development and communication of identity knowledge and orientation in a socio cultural context In essence Anderson s Imagined Communities need to be thought of as Narrated Communities from the beginning Narration is made up by what people think and vice versa narration makes up people s thoughts What is considered fictitious or real no longer separates narratives from an outside they refer to but rather represents different narratives Narration not only constructs notions of what was real in retrospect but also prospectively creates possible worlds even in the supposedly hard sciences as in e g the imaginative simulation of physical processes The book s unique interdisciplinary approach shows how the implications of this fundamental insight go far beyond the sphere of literature and carry weight for both scholarly and scientific disciplines
