The French Workers Movement Economic Crisis And Political Change:

The French Workers' Movement Mark Kesselman, 2018-12-07 First published in 1984 This volume brings together many of the foremost French and North American specialists on the French working class movement Although they differ substantially in their theoretical and ideological orientation they share a left perspective Their original essays provide a coherent and comprehensive analysis of the history of the movement focusing on the constraints and opportunities created by the economic crisis of the 1970s and the political change ushered in by the Socialist Party's victory in 1981 *States' Gains, Labor's Losses* Dorothy J. Solinger, 2018-07-05 In this explicitly comparative work Dorothy J Solinger examines the effects of global markets on the domestic politics of major states In the late 1970s leaders around the world faced a need both to continue productive investment and to cut labor costs to compete internationally in a changed world market To accommodate forces seemingly beyond their control they often opted to reduce social protections and benefits that citizens had come to expect in the process recalibrating their established political economic coalitions For countries whose governance was built on a coalition between workers and the state the political conundrum was particularly intense *States Gains Labor's Losses* concentrates on three countries China France and Mexico where revolution inspired political compacts between labor and the state had to be renegotiated In all three cases choices to forge a deepened dependence on international capital markets required the ruling parties to fire large numbers of workers and cut social benefits while attempting not to provoke widespread social unrest or even full scale revolt among their supporters China France and Mexico also shared strong legacies of protectionism and state intervention in the economy so the decision of each to join a supranational economic organization France and the EU China and the GATT WTO Mexico and NAFTA in the hope of alleviating crises of capital shortage involved submission to a new set of liberal economic rules that further compromised their sociopolitical compacts Examining a fundamental question about the dynamics of globalization and worker protest through an innovative comparative perspective *States Gains Labor's Losses* emphasizes the growing tensions and new compromises between the working class and their political leaders in the face of intense international economic pressures

Union of Parts Kathleen Thelen, 2018-05-31 *Union of Parts* examines one of the central puzzles in the economic and political successes of West Germany FRG In the decades between world war and reunification with the East the FRG provided a model for combining high rates of unionization and substantial labor peace indeed for collaboration between organized labor and organized capital as both groups faced the dislocations involved in adjusting to a changing global marketplace

Immigration Policy and the Challenge of Globalization Julie R. Watts, 2018-05-31 After years of internal debate labor union leaders have come to regard immigration as an inevitable consequence of globalization Labor leaders have come to believe that restrictive immigration policies which they once supported to protect their native constituencies do little more than encourage illegal immigration As a result most labor leaders today support more open policies that promote

legal immigration creating an unconventional unspoken partnership with employers Julie R Watts identifies globalization as the impetus behind the change in labor leaders attitudes toward immigration She then compares specific political economic and institutional circumstances that have shaped immigration preferences and policies in France Italy Spain and the United States In addition to revealing the unusual alliance between unions and employers on the immigration issue Watts examines the role both groups play in the formulation of national policy Encyclopedia of Critical Political Science Clyde W.

Barrow,2024-03-14 An indispensable and exemplary reference work this Encyclopedia adeptly navigates the multidisciplinary field of critical political science providing a comprehensive overview of the methods approaches concepts scholars and journals that have come to influence the discipline s development over the last six decades *French Industrial Relations in the New World Economy* Nick Parsons,2007-05-07

Gavroglou,1998 Constructs an analytical framework of production politics within which to address such phenomena as the erosion of wages and lost of good jobs in the US in the 1980s the emulation by US companies of production methods from elsewhere and differences and similarities between Japanese and German industrial relations Narrowing the study to the automobile industry argues that variations in labor s fortunes and competitive success can be explained by distinct patterns of labor inclusion in corporate decision making Distributed in the US by Taylor and Francis Annotation copyrighted by Book News Inc Portland OR

1968: *The World Transformed* Carole Fink,Philipp Gassert,Detlef Junker,1998-10-28 1968 *The World Transformed* presents a global perspective on the tumultuous events of the most crucial year in the era of the Cold War By interpreting 1968 as a transnational phenomenon authors from Europe and the United States explain why the crises of 1968 erupted almost simultaneously throughout the world Together the eighteen chapters provide an interdisciplinary and comparative approach to the rise and fall of protest movements worldwide The book represents an effort to integrate international relations the role of media and the cross cultural exchange of people and ideas into the history of that year 1968 emerges as a global phenomenon because of the linkages between domestic and international affairs the powerful influence of the media the networks of communication among activists and the shared opposition to the domestic and

international status quo in the name of freedom and self determination *Sacred Books of the East* F. Max Muller, 2001-10-26 This is a subset of the Sacred Books of the East Series which includes translations of all the most important works of the seven non Christian religions which have exercised a profound influence on the civilizations of the continent of Asia **Steel, State, and Labor** Anthony Daley, 2010-11-23 The creation of wealth depends on the capacity of economic actors to adapt to market changes Such adaptation in turn poses fundamental questions about the distribution of resources Daley investigates the interaction among business labor and the state in France in the second half of the twentieth century and reveals how political dynamics refract market pressures He explains how and why profitability came at the expense of union mobilization unemployment and management autonomy vast amounts of state aid and less national control over industrial decision making
