conference sessions regularly discuss the advantages of the approach But relationship marketing is not limited to theory On the contrary no service firm or business to business company can now do without some form of long term orientation and all have implemented at least some elements of the relationship marketing concept Even in the consumer goods sector there are a growing number of cases where the traditional orientation towards brand equity is being complemented by a relational focus As Berry has mentioned relationship marketing is a new old concept Several important aspects of relationship marketing were already being discussed in the marketing literature This applies both to central constructs such as customer satisfaction and to single elements such as the management of complaints and after sales services Although they do not involve explicit mention of the term relationship marketing a long term orientation can be found in the network approach of industrial marketing closely related to the work of the IMP Group in the work of Gronroos Gummesson and their colleagues at the Nordic School of Services Marketing and last but not least in the concept of customer focused marketing

The SAGE Encyclopedia of Quality and the Service Economy Su Mi Dahlgaard-Park, 2015-05-29 Society globally has entered into what might be called the service economy Services now constitute the largest share of GDP in most countries and provide the major source of employment in both developed and developing countries Services permeate all aspects of peoples lives and are becoming inseparable from most aspects of economic activity Quality management has been a dominating managerial practice since World War II With quality management initially associated with manufacturing industries one might assume the relevance of quality management might decrease with the emergence of the service economy To the contrary the emergence of the service economy strengthened the importance of quality issues which no longer are associated only with manufacturing industries but are increasingly applied in all service sectors as well Today we talk not only about product or service quality but have even expanded the framework of quality to quality of life and quality of environment Thus quality and services have emerged in parallel as closely interrelated fields The Encyclopedia of Quality and the Service Economy explores such relevant questions as What are the characteristics nature and definitions of quality and services How do we define quality of products quality of services or quality of life How are services distinguished from goods How do we measure various aspects of quality and services How can products and service quality be managed most effectively and efficiently What is the role of customers in creation of values These questions and more are explored within the pages of this two volume A to Z reference work

Cellular Phones, Public Fears, and a

Culture of Precaution Adam Burgess, 2004 This is the first account of the health panic surrounding cellular phones that developed in the mid 1990s Treating the issue as more social construction than evident scientific problem it tells the story of how this originally American anxiety diffused internationally having an even bigger impact in countries such as Italy Burgess highlights the contrasting reactions to the issue ranging from positive indifference in Finland to those such as the UK where precautionary measures were taken These differences are located within the emergence of a precautionary culture driven by institutional insecurity that first appeared in the US and is now most evident in Europe Anxieties about cell phone radiowaves are also situated historically in the very different reactions to technologies such as x rays and in the more similar microwave suspicions about television In addition Burgess outlines a history and sociology of what is despite media driven anxieties a spectacularly successful device
