The Future Of God The Revolutionary Dynamics Of Hope:

The future of God : the revolutionary dynamics of hope Carl E. Braaten,1969 **The Future of God** Carl E.

Braaten,2016-10-19 A recent movement in modern religious thought believes that the place to start in theology is at the end eschatology At a critical time in history when many are unsure of the future of faith in a secular age here is a call for believers to participate in God s activity in the future tense The basic theme in these pages is the idea of the future in the language of Christian hope and in the interpretation of history The rediscovery of the role of eschatology in the preaching of Jesus and of early Christians says Dr Braaten has been one of the most important events of recent theological history Eschatology has not al ways been taken seriously Theologians have often defined it so that the dimension of the future was allowed to slip into an eternal present God was thus viewed only in vertical terms as being above us The author feels that this loss of hope in the future precipitated the crisis known as the death of God movement In this book Dr Braaten joins those thinkers who are looking to eschatology as a point of departure for a total recasting of the Christian message He presents a constructive and systematic outline of the theology of the future and puts forth an understanding of God shared with early Christianity as being ahead of us The thrust of this theology of the future is an ethic of revolutionary change derived from the Christian vision of the kingdom of God Christianity s eschatological faith is shown to be closely connected to the revolutionary concerns of the modern world both as the sponsor of its driving images and as a companion in the struggle for its realization The final chapter turns to an ethic of revolution based on the politics of hope **Medicine and Hope: A**

Natural Theology of Human Caretaking Richard Sherlock,2024-09-12 This book expands in a modest way the discussion of hope and does so by focusing on a field where it is at the core of care taking medicine The three great religious virtues of medieval theology were faith hope and love An enormous literature exists about faith and love but much less exists about hope Doctors often know what they want to do for a patient but do not know whether they are able to have a good result If they fail will the result be worse They must hope they can succeed In other cases they know what they can do but they are uncertain whether they should If they do not undertake action will the patient try to do it themselves with a much worse result Questions such as these raise the issue of the importance of hope in medicine This book builds on an insight from the first modern textbook of medical ethics Thomas Percival s 1803 classic Medical Ethics There Percival says that the doctor is a minister of hope to the sick This book analyses this concept which is central to the practice of medicine **Blessed Rage**

for Order David Tracy,1996-03 In Blessed Rage for Order David Tracy examines the cultural context in which theological pluralism emerged Analyzing orthodox liberal neo orthodox and radical models of theology Tracy formulates a new revisionist model He considers which methods promise the most certain results for a revisionist theology and applies his model to the principal questions in contemporary theology including the meanings of religion theism and of christology *The Christian Hope* Brian Hebblethwaite,2010-09-02 What does it mean to hope for heaven Brian Hebblethwaite traces the background to

the Christian hope in the faith of Israel examines its primary basis in the acts of God in the story of Jesus Christ and follows the history of Christian attitudes to the future of humanity and of creation throughout the Christian centuries The Christian Hope tells the complex story of the different strands emphases and problems that have developed between biblical times and our own in the quest to understand the four last things death judgement heaven and hell Hebblethwaite concentrates our attention on the modern period since 1900 an era when modern Christian theology has witnessed a remarkable recovery of interest in hope and the future as dominant motifs in its reflections The discoveries of modern science have affected Christian hope and Christian understanding of creation and its ultimate destiny At different stages in the history of the church very different stresses have been laid on the present or on the future on hope for the individual or on hope for society on this worldly hope or on other worldly hope Through a study of the basis of Christian hope and of the history of its interpretation Hebblethwaite aims to present a balanced view of these different elements in the Christian tradition and a credible eschatology for today

God-- the World's Future Ted Peters, 2015 God The World's Future has been a proven and comprehensive textbook in systematic theology for over twenty years Explicitly crafted to address our postmodern context Peters explains the whole body of Christian historical doctrine from within a roleptic framework hereby the gospel is understood as announcing the pre actualization of the future consummation of all things in Jesus Christ Peters skillfully deploys this concept not only to organize the various theological areas or loci but also to rethink doctrines in light of key postmodern challenges from ecumenism critical historical thinking contemporary science and gender and sexuality issues The Third Edition is thoroughly revised with updated chapters additional chapters updated annotations and bibliographies and further elaborations in light of recent developments in method and theological reflection This classic text opens up systematic theology in new dimensions retrieving traditional categories and topics for a new generation of students and learners to give a fresh reading of Christian theology and articulation of the liberating message of the gospel of God's grace for the future of the world

God, Revelation and Authority Carl F. H. Henry, 1999 Part 5 in a monumental six volume set that presents an undeniable case for the revealed authority of God to a generation that has forgotten who he is and what he has done

Revolution and the

Christian Faith Vernon C. Grounds, 2007-05-01 In this stirring book Grounds has ably sketched the background against which the theology of revolution has emerged Grounds puts it this way I have sought to let the critics of the Establishment Christian and secular alike present in their own words the case for revolutionary change I have also sought to let the revolutionary theologians set forth their interpretation of Christianity in detail Quite literally I have allowed them to speak for themselves I have sought further to let Christian scholars who dissent from this new theology engage its proponents in debate Very heavily I have drawn upon the work of Jacques Ellul the towering French sociologist who is rapidly gaining in the United States the attention and respect which his rare fusion of professional distinction intellectual power and biblical commitment deserves I shall feel amply regarded if through these pages he wins a wider readership among American evangelicals An additional purpose has been to confront my own ecclesiastical tradition that of Protestant orthodoxy with the inexpressibly pressing need of permitting the anguish of our world to drive theological conservatism back to a New Testament discipleship which is nothing less than revolutionary
