Proceedings of the 12th European Conference on Information Warfare and Security Rauno Kuusisto, Erkki Kurkinen, 2013-11-07 *10 Years That Shook the World* Loretta Napoleoni, 2012-02-14 From 9 11 to the launch of the iPod from the creation of Gmail to the 2004 tsunami from the Enron Bankruptcy to the killing of Osama bin Laden 10 Years That Shook the World is the story of an extraordinary decade For each year Loretta Napoleoni presents events not as a chronology but as dispatches from the world's collective memory Topics like politics economics celebrities and the environment intersect and converge to reveal the accelerating pace of globalization and the changes that have affected us all *Strategic Partners* Jeanne Wilson, 2015-06-11 Russia's foreign policy experience in the first post Soviet decade was marked by disappointments as well as surprising turns Expectations that Russia would join the Western powers as an equal partner were frustrated while relations with the People's Republic of China warmed considerably Today Russia's relationship with China is an important component of its overall foreign policy orientation as the two states one greatly diminished the other clearly on the rise have found themselves sharing an interest in curbing the power of the United States In analyzing Russia's evolving foreign policy vis a vis China the author takes into account the legacy of Soviet era precedents the simultaneous processes of economic policy change and integration into global economic structures and military relations By shedding light on the role of political realism decision makers and exogenous factors in Russian foreign policy this analysis of an important bilateral relationship contributes to the larger project of understanding international relations and the dynamics of domestic and foreign policy change **The Treaty on Conventional Armed Forces in Europe** Mark Wilcox, 2024-03-04 This work examines the CFE Treaty as a factor in Russia's foreign and security policy Moscow showed amazing persistence in their relationship with the cornerstone of European security Their approach to the treaty was a genuine attempt to shape the security environment in Europe and the former USSR The treaty also enabled the dismantling of large conventional forces as they returned from Eastern Europe and transitioned into the armies of the newly independent states of the former USSR The CFE Treaty though proved ineffective at constraining the enlargement of NATO Simultaneously Moscow's foreign and security policy evolved from one that focused on the domestic development of the country to that of a more confident state reasserting itself as a great power Drawing extensively on primary sources and analyses by Russian authors this book employs two historical narratives case studies and a conceptual framework to show that while Moscow remained engaged with the CFE Treaty undesired effects on Russia's national interests gradually accrued at the expense of desired ones leading Vladimir Putin to withdraw Russia from the treaty as an act of decoupling from the collective West This book is relevant to scholars and policymakers who want to understand Russia's approach to arms control as an element of military security **Global Rules**

James E. Cronin, 2014-10-28 Questions long perceived views of post World War II America and its position in the world especially after Vietnam The author details the challenges the economic transition of the 1970s and 1980s engendered as the US and Great Britain together actively pursued their shared ideal of an international assemblage of market based democratic states

Globalization and

Conflict Robert G. Patman, 2006-08-10 This volume highlights the gap between the new security environment and the notion of state centred national security favoured by Washington showing how a Cold War phenomenon known as the national security state in which defence and foreign policy interests essentially converge remains largely intact The conventional wisdom since the suicide attacks of 9 11 is that the world has been transformed and according to President Bush September 11 changed the strategic thinking of the US This book challenges these assumptions Indeed the Bush administration's National Security strategy of 2002 has reinvigorated and even extended the idea of national security Paradoxically the renewed emphasis on a distinctly state centred approach to security including the War on Terror has unfolded during an era of deepening globalization Drawing on the international expertise of fourteen specialists the book examines four inter related themes the impact of globalization on the concept of security the strategic outlook of the world's only superpower the US the new conflicts that have come to characterize the post Cold War era efforts to regulate the emerging patterns of conflict in the world Globalization and Conflict will be essential reading for students of strategic studies security studies and international relations

The Handbook of African Defence and Armed Forces Evert Kleynhans, Marco Wyss, 2025-03-01 The Handbook of African Defence and Armed Forces provides the first in depth and multifaceted analysis of the evolution and current state of national defence policies strategies doctrines capabilities security challenges and strategic responses of African states and their armed forces Geographically these aspects are investigated at the national sub regional and regional levels Chronologically they are analysed against the backdrop of the superpower withdrawal from the continent in the 1990s and the so called New Scramble for Africa which has seen a crescendo of renewed great power interest in the continent's resources as well as its strategic role location and relevance since the 2000s The book takes a bottom up and African centric approach and is organized around five key themes i the differing security outlooks and defence policies of African powers within the region and the different sub regions ii the strategies doctrines transformation and employment of African armed forces iii the relationship between African armed forces with sub regional regional and international organizations iv the challenges that African states and their armed forces have been facing and their strategic responses and v the position of African perspectives and agency in the context of continental and international security and defence Understanding African security and defence especially in terms of each individual nation's ability to contribute to peacekeeping operations counterterrorism border security and internal security requires a focus on the national level of armed forces and defence policies this in turn sheds light on sub regional and regional divergences challenges and cooperation Based on this framework the chapters in this volume offer comprehensive African perspectives on African and international security and defence and in doing so show the agency of the continent's countries and armed forces in International Security and Relations

Strategic Shortfall Robert G. Patman, 2010-02-26 This seminal work argues that the disastrous raid in Mogadishu in 1993 and America s resulting aversion to intervening in failed states led to the Rwanda and Bosnia genocides and to the 9 11 attacks Contrary to conventional wisdom this book argues it was not the 9 11 attacks that transformed the international security environment Instead it was Somali Syndrome an aversion to intervening in failed states that began in the wake of the 1993 U S UN action in Somalia The botched raid precipitated America s strategic retreat from its post Cold War experiment at partnership with the UN in nation building and peace enforcement and engendered U S paralysis in the face of genocide in Rwanda Bosnia and Darfur The ensuing international security vacuum emboldened al Qaeda to emerge and attack America and inaugurated our present era of intrastate conflict mass killings forced relocations and international terrorism As this even handed treatment shows the Somali crisis can be connected to seven key features of the emerging post Cold War world security order These include the fact that failed states are now the main source of world instability and that new wars are driven by racial ethnic and religious identity issues
