changing conception of the psyche in Britain over the last two centuries and it demonstrates how these changes were rooted in transformed patterns of medical care The shifts from private medicine through to National Insurance and the National Health Service fostered different kinds of relationship between doctor and patient and different understandings of psychological distress The Transformation of the Psyche in British Primary Care 1880 1970 examines these transformations and in so doing provides new critical insights into our modern sense of identity and changing notions of health that will be of great value to anyone interested in the modern history of British medicine **Sir Thomas Lewis** Arthur

Textbook of Family Medicine Ian R. McWhinney,Thomas Freeman,2009 Highly successful in its first two editions McWhinney s Textbook of Family Medicine is one of the seminal texts in the field While many family medicine texts simply

cover the disorders a practitioner might see in clinical practice thus they become watered down internal medicine texts McWhinney defines the principles and practices of family medicine as a separate and distinct field of practice His initial sections cover the basic principles and philosophies of family medicine and a later section discusses the approach to the patients with common diseases encountered in practice these discussions not only address these clinical problems but each is a workshop for incorporating what it means to be a family physician into everyday practice The new edition is updated throughout with help from a group of reviewers and a new coauthor Tom Freeman who is Chairman of the Department of Family Medicine at McWhinney's institution the University of Western Ontario

A Textbook of Family Medicine Ian R. McWhinney, 1997 This text defines and conceptualizes the field of family medicine The first edition was widely acclaimed for its originality depth of analysis and elegant style The book has now been extensively revised Much new material has been added on the patient centered clinical method illness narratives the biological basis of family medicine health promotion the concept of risk and the contribution of evidence based medicine A new chapter on alternative complementary medicine fills the need for reliable information on this topic

Primary Health Care and Psychiatric Epidemiology Brian Cooper, Robin Eastwood, 2018-09-24 In the years prior to publication primary health care had been gaining in significance as a setting both for research on mental illness in the general population and for the development of new preventive approaches in this field The growing need for research had received impetus from the escalating costs of hospital based health care the re structuring of health services in a number of countries with an increased emphasis on community care and prevention and the World Health Organization's Health for All campaign in response to which a growing number of national planning documents had been published These developments had already stimulated a new interest in the scope for epidemiological and evaluative investigations based on general medical practice This book originally published in 1992 consists of selected contributions to the first international scientific meeting on this topic held in Toronto in 1989 It is made up of five sections dealing respectively with the growth and development of a new research field findings of psychiatric surveys in general practice in a number of different countries specialist and generalist medical care for mental illness issues of selection and referral and specialist aspects of late life mental disorders encountered in such research The inclusion of reports from groups of workers in the USA the UK the Netherlands Germany Spain Italy Finland Canada Australia and other countries testifies to the rapid spread of interest in these questions With the exception of the first two chapters which sketch the background of public health and general practice epidemiology all the contributions are focused on general practice as a field laboratory for study of the occurrence distribution diagnostic composition and risk factors of psychiatric illness in unselected populations and present data largely unpublished from the authors own projects These findings confirm the importance of research in general practice as a major growing point of social psychiatry and provide guidelines for further progress in the years ahead This book will still be an
