Herbert, 1993-06-15 Study drawings play a key role in the exploration and development of architecture in the early stages of design Yet these principal tools for graphic thinking have been largely taken for granted in the design professions This guide brings study drawings into the foreground by analyzing actual drawings used by architects past and present Architectural Study Drawings is the first source to provide a basis for understanding the primary means of graphic thinking used in the creation of these drawings It also explains versatile applications of these drawings in architectural practice teaching and research Evaluations of more than 80 drawings and diagrams demonstrate how study drawings are active participants in rather than passive records of the designer's graphic thinking The author probes characteristics and properties of study drawings in addition to how graphic and cognitive processes combine to guide design decision making Drawings of great past architects ranging from Leonardo da Vinci and Le Corbusier to Carlo Scarpa are analyzed Excerpts are included from recent interviews with five contemporary architects Joseph Esherick Helmut Jahn Robert Stern Stanley Tigerman and Peter Eisenman Readers will learn from these masters how to enhance the value of study drawings in various design situations Throughout the author clarifies how theoretical aspects of study drawings relate to actual design practice Detailed chapters discuss key topics such as The theoretical structure of study drawings Applications for handmade drawings How to make better use of current computer aided design CAD systems

Examples of drafting room dialogue in practice that help improve design working processes Architectural Study Drawings offers valuable insights that can be applied on the drawing board in the school and office in teaching of both media and design and in research and development for CAD systems

Nazi Propaganda Through Art & Architecture Norman Ridley, 2025-11-04 Norman Ridley explores how Hitler's artistic and architectural vision for Germany led to the monumental structures which we now associate with the Third Reich When the Nazis came to power in January 1933 they began a program of transforming Germany from a democracy into a totalitarian state but it was not a matter of simply enforcing compliance The people had to be coaxed into believing in the new regime Hearts and minds had to be won over and one of the ways the Nazis did that was to create an ideal of German nationhood in which everyone could feel proud This was especially the case with art which came to be used as a powerful tool of propaganda both to disseminate the myth amongst the population and indicate to the Nazi administrators the sort of cultural environment they should create It was not an easy thing to do While the nation was being re created as a dynamic modern and powerful industrial giant all the signals coming from Hitler indicated that his own idyllic view of the German nation was of a traditional rural people deep rooted in a romantic mystical aesthetic Hitler's own experience as an artist in Vienna before the First World War had shown that while technically proficient his work was detached and impersonal Despite being rejected by the Vienna Academy of Fine Arts he continued to see himself as artistically gifted especially in the field of architecture This book looks at how the artistic side of Hitler's personality dominated Nazi aesthetics and the ways in which the Third Reich manipulated public opinion and advanced its political agenda using the power of art Despite his early setbacks Hitler always thought of himself first and foremost an artist He would frequently break off discussions with diplomats and soldiers to veer off on a lecture about his ideas on art and architecture which had been formed during his time in Vienna Nazi Propaganda Through Art and Architecture explores how Hitler's artistic and architectural vision for Germany led to the monumental structures which we now associate with the Third Reich alongside the rural idyl he sought to espouse and how they came to symbolise the re emergent power of a German nation which would dominate Europe
