Critical Feminist Approaches to Eating Dis/Orders Helen Malson, Maree Burns, 2009-06-02 Over the past decade there have been significant shifts both in feminist approaches to the field of eating disorders and in the ways in which gender bodies body weight body management and food are understood represented and regulated within the dominant cultural milieus of the early twenty first century Critical Feminist Approaches to Eating Dis Orders addresses these developments exploring how eating disordered subjectivities experiences and body management practices are theorised and researched within postmodern and post structuralist feminist frameworks Bringing together an international range of cutting edge contemporary feminist research and theory on eating disorders this book explores how anorexia nervosa bulimia nervosa and obesity cannot be adequately understood in terms of individual mental illness and deviation from the norm but are instead continuous with the dominant cultural ideas and values of contemporary cultures This book will be essential reading for academic graduate and post graduate researchers with an interest in eating disorders and critical feminist scholarship across a range of disciplines including psychology sociology cultural studies and gender studies as well as clinicians interested in exploring innovative theory and practice in this field

The Obesity Epidemic Michael Gard, Jan Wright, 2005-04-28 Increasing obesity levels are currently big news but do we think carefully enough about what this trend actually means Everybody including doctors parents teachers sports clubs businesses and governments has a role to play in the war on obesity But is talk of an obesity crisis justified Is it the product of measured scientific reasoning or age old habits of mind Why is it happening now And are there potential risks associated with talking about obesity as an epidemic The Obesity Epidemic proposes that obesity science and the popular media present a complex mix of ambiguous knowledge familiar yet unstated moral agendas and ideological assumptions

New Directions in Social Theory, Education and Embodiment John Evans, Brian Davies, 2014-10-29 This book exemplifies the nurturing spirit of inter discursive debate with a view to opening up new theoretical and empirical insights understanding and engagement with debates on issues relating to pedagogy policy equity and embodiment From a variety of social science perspectives an international force of contributors apply a multitude of concepts to research agendas which illustrate the multiple ways in which the body both impacts culture and is simultaneously and seamlessly positioned and shaped by it maintaining social reproduction of class and cultural hierarchies and social regulation and control They attest that once we begin to trace the flow of knowledge and discourses across continents countries regions and communities by registering their re contextualisation both within various popular pedagogies e g newspapers film TV web pages IT and the formal and informal practices of schools families and peers we are compelled to appreciate the bewildering complexity of subjectivity and the ways in which it is embodied Indeed the chapters suggest that no matter how hegemonic or ubiquitous discursive practices may be they inevitably tend to generate both

intended and unexpected affects and effects people and populations cannot easily be determined suppressed or controlled This book was originally published as a special issue of Sport Education and Society **Ethical Consumption** Tania Lewis, Emily Potter, 2013-01-11 A not so quiet revolution seems to be occurring in wealthy capitalist societies supermarkets selling guilt free Fairtrade products lifestyle TV gurus exhorting us to eat less buy local and go green neighbourhood action groups bent on swapping not shopping And this is happening not at the margins of society but at its heart in the shopping centres and homes of ordinary people Today we are seeing a mainstreaming of ethical concerns around consumption that reflects an increasing anxiety with and accompanying sense of responsibility for the risks and excesses of contemporary lifestyles in the global north This collection of essays provides a range of critical tools for understanding the turn towards responsible or conscience consumption and in the process interrogates the notion that we can shop our way to a more ethical sustainable future Written by leading international scholars from a variety of disciplinary backgrounds and drawing upon examples from across the globe Ethical Consumption makes a major contribution to the still fledgling field of ethical consumption studies This collection is a must read for anyone interested in the relationship between consumer culture and contemporary social life **What We Don't Talk About When We Talk About Fat** Aubrey Gordon, 2020-11-17 From the creator of Your Fat Friend and co host of the Maintenance Phase podcast an explosive indictment of the systemic and cultural bias facing plus size people Anti fatness is everywhere In What We Don t Talk About When We Talk About Fat Aubrey Gordon unearths the cultural attitudes and social systems that have led to people being denied basic needs because they are fat and calls for social justice movements to be inclusive of plus sized people s experiences Unlike the recent wave of memoirs and quasi self help books that encourage readers to love and accept themselves Gordon pushes the discussion further towards authentic fat activism which includes ending legal weight discrimination giving equal access to health care for large people increased access to public spaces and ending anti fat violence As she argues I did not come to body positivity for self esteem I came to it for social justice By sharing her experiences as well as those of others from smaller fat to very fat people she concludes that to be fat in our society is to be seen as an undeniable failure unlovable unforgivable and morally condemnable Fatness is an open invitation for others to express disgust fear and insidious concern To be fat is to be denied humanity and empathy Studies show that fat survivors of sexual assault are less likely to be believed and less likely than their thin counterparts to report various crimes 27% of very fat women and 13% of very fat men attempt suicide over 50% of doctors describe their fat patients as awkward unattractive ugly and noncompliant and in 48 states it s legal even routine to deny employment because of an applicant s size Advancing fat justice and changing prejudicial structures and attitudes will require work from all people What We Don t Talk About When We Talk About Fat is a crucial tool to create a tectonic shift in the way we see talk about and treat our bodies fat and thin alike *The Publishers Weekly* ,1999 Psychology, Sixth Edition in Modules David G.
