Advances in Sleep Research, 1983 **Dreaming** Barbara Tedlock, 1987-11-12 The authors Jungian analysts write for psychoanalysts and therapists who wish to integrate dream interpretation into their clinical practice In this book first published hardcover in 1987 ten contributing anthropologists and psychologists explore the ways in which dreams are remembered recounted shared or not shared interpreted and used by peoples around the world Annotation copyrighted by Book News Inc Portland OR **Dynamics Of Complex Systems** Yaneer Bar-yam, 2019-03-04 This book aims to develop models and modeling techniques that are useful when applied to all complex systems It adopts both analytic tools and computer simulation The book is intended for students and researchers with a variety of backgrounds **Affective Neuroscience** Jaak Panksepp, 2004-09-30 Some investigators have argued that emotions especially animal emotions are illusory concepts outside the realm of scientific inquiry However with advances in neurobiology and neuroscience researchers are demonstrating that this position is wrong as they move closer to a lasting understanding of the biology and psychology of emotion In *Affective Neuroscience* Jaak Panksepp provides the most up to date information about the brain operating systems that organize the fundamental emotional tendencies of all mammals Presenting complex material in a readable manner the book offers a comprehensive summary of the fundamental neural sources of human and animal feelings as well as a conceptual framework for studying emotional systems of the brain Panksepp approaches emotions from the perspective of basic emotion theory but does not fail to address the complex issues raised by constructionist approaches These issues include relations to human consciousness and the psychiatric implications of this knowledge The book includes chapters on sleep and arousal pleasure and fear systems the sources of rage and anger and the neural control of sexuality as well as the more subtle emotions related to maternal care social loss and playfulness Representing a synthetic integration of vast amounts of neurobehavioral knowledge including relevant neuroanatomy neurophysiology and neurochemistry this book will be one of the most important contributions to understanding the biology of emotions since Darwins *The Expression of the Emotions in Man and Animals* **Dreaming Culture** J. Mageo, 2011-11-07 Dreams seem the most private territory of experience Yet *Dreaming Culture* argues they are a space in which we practice consider question and adapt cultural models of the self gender sexuality relationships and agency Through an innovative dream ethnography from college students in the northwestern U S this book contributes to recent research on dreaming and the brain in psychology and continuing research on dreaming and the self in clinical psychology and psychological anthropology *Dreaming Culture* uses critical theory to understand power relations embedded in cultural models a perspective often lacking in cognitive anthropology and in psychological studies of self and mind ***A'aisa's Gifts*** Michele Stephen, 2023-09-01 Filled with insight provocative in its conclusions *A'aisa's Gifts* is a groundbreaking ethnography of the Mekeo of Papua New Guinea and a valuable contribution to anthropological theory Based on twenty years fieldwork this richly detailed study of Mekeo esoteric knowledge cosmology

and self conceptualizations recasts accepted notions about magic and selfhood Drawing on accounts by Mekeo ritual experts and laypersons this is the first book to demonstrate magic s profound role in creating the self It also argues convincingly that dream reporting provides a natural context for self reflection In presenting its data the book develops the concept of autonomous imagination into a new theoretical framework for exploring subjective imagery processes across cultures Filled with insight provocative in its conclusions A aisa s Gifts is a groundbreaking ethnography of the Mekeo of Papua New Guinea and a valuable contribution to anthropological theory Based on twenty years fieldwork this richly detailed study of Mek
