Tax Policy And The Economy Vol 1:

Tax Policy and the Economy, Volume 37 Robert A. Moffitt, 2023-06-19 Timely and authoritative research on the latest issues in tax policy Tax Policy and the Economy publishes current academic research on taxation and government spending with both immediate bearing on policy debates and longer term interest This volume of Tax Policy and the Economy presents new research on important issues concerning US taxation and transfers First Edward L Glaeser Caitlin S Gorbach and James M Poterba examine the distribution of burdens associated with taxes on transportation Replacing the gasoline tax with a vehicle miles traveled VMT tax would increase the burden on higher income households who drive more fuel efficient cars and are more likely to own electric vehicles User charges for airports subways and commuter rail are progressive while the burden of bus fees is larger for lower income households than for their higher income counterparts Next Katarzyna Bilicka Michael Devereux and Irem G eri investigate tax shifting by multinational companies MNCs and the implications of a potential Global Minimum Tax GMT They find that MNCs shift intellectual property to tax havens and that a large share of patenting activity takes place in tax havens where little or no R such firms would likely be subject to a GMT Mark Duggan Audrey Guo and Andrew C Johnston study the role of experience rating in the Unemployment Insurance UI system and find that the current structure stabilizes the labor market because it penalizes firms with high rates of UI eligible layoffs In the fourth paper David Altig Laurence J Kotlikoff and Victor Yifan Ye calculate how retiring at different ages will affect Social Security benefit amounts taking into account taxation and other benefits They find that virtually all individuals aged 45 to 62 should wait until age 65 or later to maximize their Social Security benefits Indeed 90 percent would benefit from waiting until age 70 but only 10 percent do so Finally Jonathan Meer and Joshua Witter examine the potential impact of the Earned Income Tax Credit on the labor force decisions of childless adults who are eligible for a small credit after they reach age 25 Comparing labor force attachment changes just before and after this age suggests that the EITC has little impact on the labor force participation of this group

Tax Policy and the Economy, Volume 28 Jeffrey R. Brown, 2014-11-05 The papers in Volume 28 of Tax Policy and the Economy illustrate the depth and breadth of the research by NBER research associates who study taxation and government spending programs The first paper explores whether closely held firms are used as tax shelters The second examines the taxation of multinational corporations The third discusses the taxation of housing focusing on the ways in which current income tax rules may affect location and consumption decisions and lead to economic inefficiencies The fourth paper offers an historical perspective on the political economy of gasoline taxes with a particular focus on the response to the oil shocks of the early 1970s The fifth and final paper uses the tools of financial economics to estimate the unfunded liabilities of the Pension Benefit Guaranty Corporation

Tax Policy and the Economy James M. Poterba, 1996 The Tax Policy and the Economy series presents new research bearing on the economic effects of taxation on economic performance and analyzing the effects of potential tax reforms Research results are presented in a timely and

accessible fashion and will be of interest to tax practitioners and those involved in formulating tax policy

Tax Policy and the Economy, Volume 30 Jeffrey R. Brown, 2016-08-08 The research papers in Volume 30 of Tax Policy and the Economy make significant contributions to the academic literature in public finance and provide important conceptual and empirical input to policy design In the first paper Gerald Carlino and Robert Inman consider whether state level fiscal policies create spillovers for neighboring states and how federal stimulus can internalize these externalities The second paper by Nathan Hendren presents a new framework for evaluating the welfare consequences of tax policy changes and explains how the key parameters needed to implement this framework can be estimated The third paper a collaborative effort by several academic and US Treasury economists documents the dramatic increase in pass through businesses including partnerships and S corporations over the last thirty years It notes that these entities now generate more than half of all US business income The fourth paper examines property tax compliance using a pseudo randomized experiment in Philadelphia in which those who owed taxes received supplemental letters regarding their tax delinquency The research explores what types of communication lead to higher rates of tax payment In the fifth paper Jeffrey Clemens discusses cross program budgetary spillovers of minimum wage regulations Severin Borenstein and Lucas Davis the authors of the sixth paper study the distributional effects of income tax credits for clean energy

Tax Policy and the Economy, Volume 38 Robert A. Moffitt, 2024-06-24 Timely and authoritative research on the latest issues in tax policy Tax Policy and the Economy publishes current academic research on taxation and government spending with both immediate bearing on policy debates and longer term interest This volume presents new research on taxation and public expenditure programs with particular focus on how they affect economic behavior John Guyton Kara Leibel Dayanand Manoli Ankur Patel Mark Payne and Brenda Schafer study the disallowance of Earned Income Tax Credit EITC benefits as a result of IRS audits and find that in post audit years audited taxpayers are less likely than similar non audited taxpayers to claim EITC benefits Janet Holtzblatt Swati Joshi Nora Cahill and William Gale provide new empirical evidence on racial differences in the income tax penalty or bonus associated with a couple being married Haichao Fan Yu Liu Nancy Qian and Jaya Wen evaluate how computerizing value added tax transactions in China affected the tax revenue collected from large manufacturing firms Niels Johannesen Daniel Reck Max Risch Joel Slemrod John Guyton and Patrick Langetieg study data on the ownership of foreign bank accounts and other financial accounts as reported on income tax returns They find that many of these accounts are in tax havens and they discuss the impact of the Foreign Account Tax Compliance Act on tax compliance and government revenue Louis Kaplow integrates charitable giving into an optimal income tax framework and shows that the externalities associated with such giving are key to determining its optimal tax treatment Finally Roger Gordon compares caps or quantity targets on emissions with carbon taxes and points out that which one dominates can be situation specific and depend on a number of features of the economy

Environmental and Energy Policy and the Economy Matthew J. Kotchen, Tatyana Deryugina, James H.

Stock,2023-02-20 Rigorous careful and nonpartisan research with a high policy impact on environmental and energy economics Environmental and Energy Policy and the Economy focuses on the effective and efficient management of environmental and energy challenges Research papers offer new evidence on the intended and unintended consequences the market and nonmarket effects and the incentive and distributional impacts of policy initiatives and market developments This volume presents six new papers on environmental and energy economics and policy Gilbert Metcalf examines the distributional impacts of substituting a vehicle miles traveled tax for the existing federal excise tax in the United States David Weisbach Samuel Kortum Michael Wang and Yujia Yao consider solutions to the leakage problem of climate policy with differential tax policies on the supply and demand for fossil fuels and on domestic production and consumption Danae Hernandez Cortes Kyle Meng and Paige Weber quantify and decompose recent trends in air pollution disparities in the US electricity sector Severin Borenstein and Ryan Kellogg provide a comparative analysis of different incentive based mechanisms to reduce emissions in the electricity sector on a path to zero emissions Sarah Anderson Andrew Plantinga and Matthew Wibbenmeyer document distributional differences in the allocation of US wildfire prevention projects Finally Mark Curtis and Ioana Marinescu provide new evidence on the quality and quantity of emerging green jobs in the United States

Handbook of Law and Economics A. Mitchell Polinsky,Steven Shavell,2007-11-07 Law can be viewed as a body of rules and legal sanctions that channel behavior in socially desirable directions for example by encouraging individuals to take proper precautions to prevent accidents or by discouraging competitors from colluding to raise prices The incentives created by the legal system are thus a natural subject of study by economists Moreover given the importance of law to the welfare of societies the economic analysis of law merits prominent treatment as a subdiscipline of economics Our hope is that this two volume Handbook will foster the study of the legal system by economists The two volumes form a comprehensive and accessible survey of the current state of the field Chapters prepared by leading specialists of the area Summarizes received results as well as new developments

Empirical Foundations of Household Taxation Martin Feldstein,James M. Poterba,2008-04-15 Tax policy debates and reforms depend heavily on estimates of how alternative tax rules would affect behavior Yet there is considerable controversy about the key empirical links among tax rates household decisions and

revenue collections The nine papers in this volume exploit the substantial variation in U S tax policy during the last two decades to investigate how taxes affect a range of household behavior including labor force participation saving behavior choice of health insurance plan choice of child care arrangements portfolio choice and tax evasion They also present new analytical results on the effects of different types of tax policy All of this research relies on household level data drawn either from public use tax return files or from large household level surveys to explore various aspects of the relationship between taxes and household behavior As debates about the effects of proposed tax reforms continue in the 1990s this volume will be of interest to policy makers and scholars in the field of public finance The Economics of Art Museums Martin

Feldstein,2009-05-15 The National Bureau of Economic Research organized a project to explore the economic issues facing the major art museums of the United States For this purpose NBER defined economics broadly to include not only the financial situation of the museums but also the management and growth of museum collections the museums relationship with the public and the role of the government in supporting art museums This volume brings together nontechnical essays on these issues by economists associated with the NBER and personal statements by leaders of America s major national art museums and related foundations It can be read not only by economists but also by museum officials and trustees Museum directors generally come to their responsibilities with a background in art history and curatorial work but without experience in thinking about the management and public policy aspects of museum administration Trustees who serve on museum boards generally have a background in business or law but have not previously tried to apply their experience to the unusual economic problems of museums The background papers the panelists remarks and the summary of the discussion will help them to approach their responsibilities with a better understanding of the problems and possibilities of the museum **Tax**

World Economy Angus Maddison,2007 *Climate Change 1995: Economic and Social Dimensions of Climate Change*

Hoe-söng Yi,Intergovernmental Panel on Climate Change. Working Group III.,1996-06-27 The consequences of climate change for society are analysed in this landmark assessment from the IPCC This book assesses the available knowledge on the many issues that society has to face including the international decision making framework applicability to climate change of techniques for assessing costs and benefits the significant social costs of projected climate change and the economic assessment of policy instruments to combat climate change nationally and internationally Some important conclusions of this Second Assessment Report indicate that 10 to 30% of greenhouse gas emissions in most countries can be reduced at negative or zero cost no regrets measures Also the literature indicates that climate change will cause aggregate net damage which provides an economic rationale for going beyond no regrets measures It also indicates that a portfolio of

mitigation adaptation and research measures is a sound strategy for addressing climate change given the remaining uncertainties This report speaks directly to the issues that are faced by the many countries committed to limit emissions of greenhouse gases by the year 2000 and currently negotiating actions to be taken beyond that date Will be of great value to the international community of policymakers interested in the consequences of climate change as well as to economists social and natural scientists

Public Policy and the Tax System G. A. Hughes,G. M. Heal,2025-08-01 Originally published in 1980 this volume reviews and synthesises some of the analytical models used by economists in the late 20th century to tackle certain major questions of public policy and specifically issues of fiscal policy in its widest sense The essays dedicated to the economist James Meade and written by contributors who were associated with him at Cambridge provide students and professional economists with an understanding of the ways in which specific taxes and general fiscal instruments may be used to achieve the goals of public policy with respect to the distribution of income and wealth the allocation of resources and the overall balance and growth of aggregate economic activity

Handbook of Public Economics Martin Feldstein,A.J. Auerbach,2002-01-25 The Field of Public Economics has been changing rapidly in recent years and the sixteen chapters contained in this Handbook survey many of the new developments As a field Public Economics is defined by its objectives rather than its techniques and much of what is new is the application of modern methods of economic theory and econometrics to problems that have been addressed by economists for over two hundred years More generally the discussion of public finance issues also involves elements of political science finance and philosophy These connections are evidence in several of the chapters that follow Public Economics is the positive and normative study of government s effect on the economy We attempt to explain why government behaves as it does how its behavior influences the behavior of private firms and households and what the welfare effects of such changes in behavior are Following Musgrave 1959 one may imagine three purposes for government intervention in the economy allocation when market failure causes the private outcome to be Pareto inefficient distribution when the private market outcome leaves some individuals with unacceptably low shares in the fruits of the economy and stabilization when the private market outcome leaves some of the economy s resources underutilized The recent trend in economic research has tended to emphasize the character of stabilization problems as problems of allocation in the labor market The effects that government intervention can have on the allocation and distribution of an economy s resources are described in terms of efficiency and incidence effects These are the primary measures used to evaluate the welfare effects of government policy
