Tax Policy And The Economy Vol 6:

Tax Policy and the Economy James M. Poterba, 1993 The Tax Policy and the Economy series presents new research bearing on the economic effects of taxation on economic performance and analysis of the effects of potential tax reforms. Results of research are presented in a timely and accessible fashion and will be of interest to tax practitioners and those involved in formulating tax policy. James M. Poterba is Professor of Economics at the Massachusetts Institute of Technology. Contents: Alternatives to Traditional IRAs; Floors and Ceilings in Saving Incentives; B. Douglas Bernheim, New Evidence on the Incentive Effects of R & D Tax Credits; Bronwyn H. Hall, Interindustry Subsidies and the Unemployment Insurance Payroll Tax; Bruce D. Meyer, What Do We Know About Enterprise Zones; Leslie E. Papke, Understanding the Widening Income Distribution of the 1980s; James M. Poterba and Daniel R. Feenberg. **Tax Policy and the Economy, Volume 37** Robert A.

Moffitt, 2023-06-19 Timely and authoritative research on the latest issues in tax policy. Tax Policy and the Economy publishes current academic research on taxation and government spending with both immediate bearing on policy debates and longer term interest. This volume of Tax Policy and the Economy presents new research on important issues concerning US taxation and transfers. First, Edward L. Glaeser, Caitlin S. Gorbach, and James M. Poterba examine the distribution of burdens associated with taxes on transportation. Replacing the gasoline tax with a vehicle miles traveled (VMT) tax would increase the burden on higher income households who drive more fuel efficient cars and are more likely to own electric vehicles. User charges for airports, subways, and commuter rail are progressive, while the burden of bus fees is larger for lower income households than for their higher income counterparts. Next, Katarzyna Bilicka, Michael Devereux, and Irem G. Eri investigate tax shifting by multinational companies (MNCs) and the implications of a potential Global Minimum Tax (GMT). They find that MNCs shift intellectual property to tax havens and that a large share of patenting activity takes place in tax havens where little or no R&D such firms would likely be subject to a GMT. Mark Duggan, Audrey Guo, and Andrew C. Johnston study the role of experience rating in the Unemployment Insurance (UI) system and find that the current structure stabilizes the labor market because it penalizes firms with high rates of UI eligible layoffs. In the fourth paper, David Altig, Laurence J. Kotlikoff, and Victor Yifan Ye calculate how retiring at different ages will affect Social Security benefit amounts, taking into account taxation and other benefits. They find that virtually all individuals aged 45 to 62 should wait until age 65 or later to maximize their Social Security benefits. Indeed, 90 percent would benefit from waiting until age 70, but only 10 percent do so. Finally, Jonathan Meer and Joshua Witter examine the potential impact of the Earned Income Tax Credit on the labor force decisions of childless adults who are eligible for a small credit after they reach age 25. Comparing labor force attachment changes just before and after this age suggests that the EITC has little impact on the labor force participation of this group. **Tax Policy and the Economy, Volume 38** Robert A. Moffitt, 2024-06-24 Timely and authoritative research on the latest issues in tax policy. Tax Policy and the Economy publishes current academic research on taxation and government spending with both immediate

bearing on policy debates and longer term interest This volume presents new research on taxation and public expenditure programs with particular focus on how they affect economic behavior John Guyton Kara Leibel Dayanand Manoli Ankur Patel Mark Payne and Brenda Schafer study the disallowance of Earned Income Tax Credit EITC benefits as a result of IRS audits and find that in post audit years audited taxpayers are less likely than similar non audited taxpayers to claim EITC benefits Janet Holtzblatt Swati Joshi Nora Cahill and William Gale provide new empirical evidence on racial differences in the income tax penalty or bonus associated with a couple being married Haichao Fan Yu Liu Nancy Qian and Jaya Wen evaluate how computerizing value added tax transactions in China affected the tax revenue collected from large manufacturing firms Niels Johannesen Daniel Reck Max Risch Joel Slemrod John Guyton and Patrick Langetieg study data on the ownership of foreign bank accounts and other financial accounts as reported on income tax returns They find that many of these accounts are in tax havens and they discuss the impact of the Foreign Account Tax Compliance Act on tax compliance and government revenue Louis Kaplow integrates charitable giving into an optimal income tax framework and shows that the externalities associated with such giving are key to determining its optimal tax treatment Finally Roger Gordon compares caps or quantity targets on emissions with carbon taxes and points out that which one dominates can be situation specific and depend on a number of features of the economy OECD Tax Policy Studies Inheritance Taxation in OECD Countries OECD,2021-05-11

The report explores the role that inheritance taxation could play in raising revenues addressing inequalities and improving efficiency in OECD countries It provides background on the distribution and evolution of household wealth and inheritances assesses the case for and against inheritance taxation drawing on existing theoretical and empirical literature and examines the design of inheritance estate and gift taxes in OECD countries **Tax Policy Handbook** Mr.Parthasarathi

Shome,1995-04-25 Edited by Parthasarathi Shome this Handbook was written primarily for economists who are responsible for analyzing and evaluating economic policies of developing countries at an applied level and who would benefit from a comprehensive discussion of the concepts principles and prevailing issues of taxation **The Effect of Expected Effective**

Corporate Tax Rates on Incremental Financing Decisions Mr.Reint Gropp,1997-04-01 This paper uses U S panel data to estimate the effect of expected effective corporate tax rates on firm s leverage The paper directly estimates expected corporate tax rates using rational expectations The estimated measures of the expected effective tax rates of firms are related to a continuous measure of incremental debt financing The paper finds that expected effective tax rates are significantly and positively related to a higher level of debt financing Simulations suggest that debt issues would double if firms were unable to shield profits and actually faced the statutory tax rate **Increasing Productivity and**

the BEPS Era Sergio André Rocha, Allison Christians, 2016-04-24 The power of a country to freely design its tax system is generally understood to be an integral feature of sovereignty. However, as an inevitable result of globalization and income mobility, one country's exercise of tax sovereignty often overlaps, interferes with, or even impedes that of another. In this collection of essays, internationally respected practitioners and academics reveal how the OECD's Base Erosion and Profit Shifting (BEPS) initiative, although a major step in the right direction, is insufficient to resolve the tax sovereignty paradox. Each contribution deals with different facets of a single topic: How tax sovereignty is shaped in a post-BEPS world. The contributors provide in-depth analysis of such relevant issues as the following: Why multilateral cooperation and soft-law consensus are the preferred solutions to a loss of autonomy over national tax policy; how digital commerce has upended traditional notions of source and residence; why residence and source continue to be the two essential building blocks of tax sovereignty and the backbone of the international tax system; how developing countries can take advantage of the new international tax architecture to ensure that their voices are truly shaping the standards and transfer pricing reform. Collectively, the authors provide an authoritative commentary on the necessary preconditions for exercising the power to tax in today's world. Their perspectives and recommendations will prove of great value to all policymakers, legislators, practitioners, and academics in the international taxation arena. *Taxation* Simon R. James, 2002 *OECD Economic Surveys: Chile 2021*

OECD, 2021-02-20 In the last decades, Chile has made tremendous progress towards greater economic prosperity and lower poverty. Per capita income more than doubled over the past 20 years and is now the highest in Latin America. These progresses have now come to a halt. Since October 2019, Chile has faced two unprecedented shocks: the social protests and the COVID-19 outbreak. **Taxation, Wealth, and Saving** David F. Bradford, 2000 Eventually, Bradford became convinced that the politically unpopular consumption-based model was the superior one. Since leaving the Treasury, much of his professional focus has been on economic analysis of the income tax system and on tax policy advocacy. *Contemporary Macroeconomic Theory and Policy* Raghbendra Jha, 2008 This book is an exhaustive study of current macroeconomic theory. It starts from the first principles of macroeconomics in Part I and develops the orthodox Keynesian approach with fixed and flexible prices in Part II. In Part III, the author discusses the modern theories of inflation and unemployment. Among the topics covered are Phillips curves and natural rate of unemployment, the accelerationist controversy, rational expectations, staggered wage setting, and new classical macroeconomics. In Part IV, the theoretical underpinnings of key empirical macro relations such as the consumption function, investment function, and demand and supply of money are discussed. Part V concentrates on open economy aspects of macroeconomics. Both current account and asset balance approaches are discussed, and there is an exhaustive treatment of policy making in open economies. Part VI considers medium-term dynamics of the public debt and business cycles. Part VII concentrates on real and monetary growth and also considers optimal economic growth. Part VIII considers two important issues in current
