Tax Systems and Tax Reforms in South and East Asia Luigi Bernardi, Angela Fraschini, Parthasarathi Shome, 2007-01-24 This book examines the present status recent tax reforms and planned tax policies in some South and East Asia countries since the 1990s The evidence is presented in a user friendly manner but at the same time uses technically sophisticated methods The main countries studied are China India Japan Malaysia South Korea and Thailand It is unique for being the first systematic treatment of the topic hitherto the information available has been widely dispersed and difficult to access It should prove to be a natural companion to two previous books on taxation published by

Routledge and also edited by Luigi Bernardi **The Political Economy of Taxation** Paola Profeta, Simona Scabrosetti, 2010-01-01 Providing light to a subject that is not often enough discussed The Political Economy of Taxation is packed cover to cover with thoughtful information and a core addition to any international economic studies collection The Midwest Book Review Paola Profeta and Simona Scabrosetti have provided us with a novel comparative analysis of the tax systems in Asia Latin America and the new EU countries Anyone who wants to know how contemporary empirical models can be used to study the political economy of the tax mix in developing and transition economies will want to read this book Stanley Winer Carleton University Canada In this original book Paola Profeta and Simona Scabrosetti use data and information on political institutions from developing and new EU member countries to investigate the political economy of taxation How do political institutions influence tax burdens and tax structures They generate highly interesting results I am sure that this innovative book will attract the attention of many experts interested in taxation regardless of the professional field to which they are anchored I expect this book will be cited often Vito Tanzi International Institute of Public Finance US Taxation is a major issue in the economic and political spheres This book focuses on a sample of developing countries from Asia and Latin America that experienced an economic and democratic transition during the period 1990 2004 Using a unique dataset the authors show that tax revenue is higher in more democratic regimes consistent with the standard view that democracies have to satisfy the redistributive needs of the electorate They also find that a second relationship between the level of democracy and the composition of taxes mainly direct versus indirect is much harder to predict However a comparison with new EU member states suggests that more mature democracies are associated with higher levels of direct tax This unique book in a relatively under researched subject area will prove essential reading for academics researchers and practitioners focusing on political economy public finance and the economics of taxation **Tax Systems and Tax Reforms in Europe** Luigi Bernardi, Paola Profeta, 2004 This impressive book featuring contributions from leading scholars will be of great interest not only to academics but also to those involved in the financial sectors across the world **The Elgar Guide to Tax Systems** Emilio Albi, Jorge Martinez-Vazquez, 2011-01-01 Tax systems have changed considerably in the past three decades These fundamental changes have been the result of economic globalization new political stances and also of developments in public finance thought The chapters in this volume offer a critical review of those changes from the perspectives of tax theory policy and tax administration practice and the political economy of taxation The authors also consider what sort of reforms are worth undertaking in tax policy design tax administration and enforcement and the assignment of sub national taxes The authors in this volume are among the top scholars in the study of public finance The development of tax systems in OECD countries is examined as are various methods of taxation direct versus indirect corporate income tax value added tax and others employed throughout the world The politics of public finance and the institutions used to administer it are also analyzed Reflecting on the influence of the research itself Richard Bird closes the

book with a chapter exploring whether or not economic literature has focused on the issues and problems that really matter to policymakers and whether it has influenced the development of tax systems Publisher's website

Challenges of Social Cohesion in Times of Crisis M. Zupi, E. Estruch Puertas, 2010

Politiche pubbliche, sviluppo e crescita Bruno Bosco, Giuseppe Pisauro, 2005

CGE Models and Capital Income Tax Reforms Doina Maria Radulescu, 2007-09-13 The book suggests a novel way how the effects of tax reforms especially in the field of capital income taxation can be measured by means of dynamic computable general equilibrium CGE models Using a model calibrated to the German economy the author evaluates and quantifies the effects of introducing a Dual Income Tax DIT in Germany This tax reform is a currently hotly debated topic in Germany and has been suggested both by the German Council of Economic Advisors GCEA and by Prof Hans Werner Sinn Thus the book is of great interest not only for the academic but also for the business world and politics

Tax Systems and Tax Reforms in Latin America Luigi Bernardi, Alberto Barreix, Anna Marenzi, Paola Profeta, 2007-12-24 This book provides a comprehensive analysis of tax systems and tax reforms in a number of Latin American countries since the early 1990s including Argentina and Brazil Costa Rica and Mexico Paraguay Colombia Chile and Uruguay The authors present and discuss tax systems from a broad quantitative and historical perspective and describe the mai

Tax Reform in Open Economies Iris Claus, 2010-01-01 This book brings together research from some of the world's leading tax economists to discuss appropriate directions for tax reform in small open economies The eminent contributors including Altshuler Creedy Freebairn Gravelle Heady Kalb S rensen and Zodrow investigate the beneficial directions for medium term tax reform in the light of global developments and lessons from the latest taxation research In addressing this issue they review recent advances in both the theoretical and empirical tax literature and reform evidence from individual countries Topics covered include the impact of taxes on economic performance international and corporate taxation personal tax and welfare systems environmental taxation and country specific tax reform experiences Bringing together leading international experts to explore specific policy reforms this book will prove essential reading for academics and researchers of public economics fiscal policy and tax reform It will also be warmly welcomed both by undergraduate and graduate students of public economics or the economics of taxation as well as policymakers and government officials working in the area of tax policy

Contradictions and Limits of Neoliberal European Governance J. Drahokoupil, L. Horn, 2008-11-27 An ambitious volume that sets out to analyse the nature contradictions and limits of neoliberal governance in the EU The analysis covers the changing geopolitical and geo economic context the Lisbon agenda and the contestation and mobilization against the European project such as manifested in the national resistance against the constitution

Baltic Journal of Economics, 2005

OECD Tax Policy Studies Recent Tax Policy Trends and Reforms in OECD Countries OECD, 2004-10-19 This ninth volume of the OECD Tax Policy Studies series reports on trends in the areas of tax revenues the tax mix and the taxation of labour dividends and personal and corporate income It also looks at value added and environmental taxes

The

EU Common Consolidated Corporate Tax Base Dennis Weber, Jan van de Streek, 2016-04-24 In October 2016 the European Commission relaunched its plan to harmonize national income tax systems via the Common Consolidated Corporate Tax Base CCCTB perhaps the most ambitious reform of EU tax law ever attempted This timely book offers an early analysis of this important proposal and its implications covering issues such as the project's scope and main elements international considerations the relationship with OECD's base erosion and profit shifting BEPS initiative consolidation and anti abuse rules With carefully selected papers first presented at a January 2017 conference hosted by the Amsterdam Centre for Tax Law this volume focuses on such topics and issues as the following ways in which the proposed CCCTB is designed to preserve the competence of Member States to set their own tax rates reduction of the administrative burden for multinational companies incentives for research and development automatic cross border relief within the EU detailed analysis of the proposal's formula apportionment regime proposed new controlled foreign company CFC rules and interest limitation rule Because of the commitment of many Member States to keep their corporate income tax systems competitive on a stand alone basis the proposed CCCTB is enormously controversial This book provides authoritative insights into problems likely to arise and discusses the prospects of how the proposal is likely to be implemented Thus this book proves to be of immeasurable value to taxation policymakers practitioners and academics **Uncertainty and Challenges in**

Contemporary Economic Behaviour Ercan Özen, Simon Grima, 2020-09-25 Every day presents new challenges as the face of global economics changes In this first book in the Emerald Studies in Finance Insurance and Risk Management expert editors and contributors come together to discuss global response to new uncertainty and challenges *Central and East European Politics* Zsuzsa Csergo, Daina S. Eglitis, Paula M. Pickering, 2021-06-22 Now in a fully revised and updated edition this essential text provides a comprehensive introduction to Central and Eastern Europe including the Baltics and Ukraine Broad but nuanced it offers a reader friendly overview of the globally and regionally significant changes and challenges the region faces Divided into two parts the book first presents thematic chapters on key issues including nationalism and challenges to democratic institutions and practices the contentious politics of memory debates over demography and migration in a region with a shrinking population and Russian efforts to retain regional influence through hard and soft power The case study chapters that follow highlight key political developments after communism as well as providing a strong foundation for readers on regional history and the political and economic experiences of the communist years Each covers the foundational topics of political history political competition economic development social problems relationships with European institutions and threats to good governance For students and specialists alike this book will be an invaluable resource on this dynamic region of Europe **Tax Treaties: Building Bridges between Law and Economics**, 2010 In this book experts from the field of economics take a different view of tax treaty issues than experts from the field of law In order to encourage the much needed communication between these two groups a cross disciplinary conference was held to

discuss selected tax treaty issues from both a legal and economic perspective Twenty five conference papers on eight topics were prepared by lawyers and economists The papers on legal issues were presented and discussed by economists and vice versa The interdisciplinary focus of the conference not only allowed an exchange of knowledge between two groups who think differently about similar issues but also made it possible to better grasp the impact of the thinking of one group on the areas of interest to the other group The outcome of the conference is reflected in this book By showing the legal and the economic approaches to an issue this book improves the general understanding of the two disciplines and demonstrates how the decisions in one discipline may influence the other discipline and its concepts Twenty two contributions are included written by the most distinguished academics practitioners and representatives of several international tax administrations and both tax and economic institutions

Reforming Tax Systems Vahram Stepanyan, 2003-09-01 Starting in the early 1990s the Baltics Russia and other BRO countries of the former Soviet Union initiated tax reforms that varied widely at the later stages Recently some of the BRO countries basing decisions on the proposition that lowering of the top marginal income tax rate would significantly benefit economic development and increase tax compliance have initiated a new stage of tax reforms This paper reviews country experiences and suggests that i overall there seems to be little evidence of a substantial improvement in income tax revenues resulting simply from a reduction in the top marginal tax rates and ii in the BRO countries the elasticity of the behavior of economic agents in terms of labor supply saving and investment with respect to income tax rates is not large and a reduction of the existing income tax rates is unlikely to lead to a notable expansion of economic activity
