The Stakeholder Society Bruce Ackerman, Anne Alstott, 2008-10-01 A quarter century of trickle down economics has failed Economic inequality in the United States has dramatically increased Many alas seem resigned to this growing chasm between rich and poor But what would happen ask Bruce Ackerman and Anne Alstott if America were to make good on its promise of equal opportunity by granting every qualifying young adult a citizen s stake of eighty thousand dollars Ackerman and Alstott argue that every American citizen has the right to share in the wealth accumulated by

preceding generations The distribution of wealth is currently so skewed that the stakeholding fund could be financed by an annual tax of two percent on the property owned by the richest forty percent of Americans Ackerman and Alstott analyze their initiative from moral political economic legal and human perspectives By summoning the political will to initiate stakeholding they argue we can achieve a society that is more democratic productive and free Their simple but realistic plan would enhance each young adult s real ability to shape his or her own future It is in short an idea that should be taken seriously by anyone concerned with citizenship welfare dependency or social justice in America today Written Proposals on Tax Simplification ,1990 Contains reproductions of numerous letters and statements sent to the Ways and Means Committee on tax simplification by citizens government officials companies and associations Taxation and Resentment Andrea Louise Campbell,2025-06-10 Why Americans favor progressive taxation in principle but not in practice Most Americans support progressive taxation in principle and want the rich to pay more But the specific tax policies that most favor are more regressive than progressive What is behind such a disconnect In this book Andrea Louise Campbell examines public opinion on taxation exploring why what Americans favor in principle differs from what they accept in practice Campbell shows that since the federal income tax began a century ago the rich have fought for lower taxes through reduced rates and a complicated system of tax breaks The resulting complexity leaves the public confused about who benefits from the convoluted tax code and leads to tax preferences that are driven by factors other than principles or interests Campbell argues that tax attitudes vary little by income or by party as some Democrats more Republicans and even more independents want most taxes decreased Instead white opinion on nearly every tax is racialized Many do not realize the rich benefit the most from tax breaks attitudes toward which are racialized too And among Black and Hispanic Americans long subject to government coercion greater support for government spending is not matched by greater support for taxation Everyone has a reason to dislike taxes which helps antitax Republicans win votes and helps the rich in their long campaign to get their own taxes reduced and undermine progressivity Yale Law School Yale Law School,1996 Law Outlines William M.
