Im Buchbinder,2004-09 **Goal Attainment Scaling** Thomas J. Kiresuk,Aaron Smith,Joseph E. Cardillo,2014-02-25

There is an extensive literature on Goal Attainment Scaling GAS but the publications are widely scattered and often inaccessible covering several foreign countries and many professional disciplines and fields of application This book provides both a user manual and a complete reference work on GAS including a comprehensive account of what the method is what its strengths and limitations are how it can be used and what it can offer The book is designed to be of interest to service providers program directors and administrators service and business organizations program evaluators researchers and students in a variety of fields No previous account of GAS has provided an up to date comprehensive description and explanation of the technique The chapters include a basic how to do it handbook step by step implementation instructions frequently occurring problems and what should be done about them methods for monitoring the quality of the goal setting process and a discussion of policy and administration issues There are many illustrations from actual applications including examples of goals scaled for the individual the specific program the agency or the total system Procedures for training and estimates of training costs are also provided **Selected Water Resources Abstracts** ,1983 **The Second Language Learning Processes of Students with Specific Learning Difficulties** Judit Kormos,2016-12-08

The Second Language Learning Processes of Students with Specific Learning Difficulties is the only recent book available to offer a detailed and in depth discussion of the second language learning processes of students with specific learning difficulties SpLDs It summarizes research advances in the fields of cognitive and educational psychology and integrates them with recent studies in the area of second language acquisition SLA Thus the book is relevant not only to readers who are particularly interested in the role of specific learning difficulties in learning additional languages but also to those who would like to understand how individual differences in cognitive functioning influence SLA The book focuses on four important areas that are particularly relevant for language learners with SpLDs the processes of SLA in general and the development of reading skills in particular the effectiveness of pedagogical programs the assessment of the language competence of students with SpLDs and identifying SpLDs in another language The book also views learners with SpLDs in their social and educational contexts and elaborates how the barriers in these contexts can affect their language learning processes This is an excellent resource for language teachers students and researchers in the areas of second language acquisition and applied linguistics The Safety Anarchist Sidney Dekker,2017-10-19 Work has never been as safe as it seems today Safety has also never been as bureaucratized as it is today Over the past two decades the number of safety rules and statutes has exploded and organizations themselves are creating ever more internal compliance requirements At the same time progress on safety has slowed to a crawl Many incident and injury rates have flatlined Worse excellent safety performance on low consequence events tends to increase the risk of fatalities and disasters Bureaucracy and compliance now seem less about managing the safety of the workers we are responsible for and more about managing the liability of the people they work for We make

workers do a lot that does nothing to improve their success locally Paradoxically such tightening of safety bureaucracy robs us of exactly the source of human insight creativity and resilience that can tell us how success is actually created and where the next accident may well happen It is time for Safety Anarchists people who trust people more than process who rely on horizontally coordinating experiences and innovations who push back against petty rules and coercive compliance and who help recover the dignity and expertise of human work
