that All right I learned it all when I was getting my higher professional qualifications in business administration and management in the age of the dinosaurs when Peter Drucker ruled supreme as Tyrannosaurus Rex and the more things change the more they remain the same We business professionals just loved to make everything so complicated for our future students to impress them about how knowledgeable we were We had graphs plans flowcharts and anything else which would look very impressive on the whiteboard or on paper or on LCD presentations And everybody would marvel and say Wow our professor really knows her subject really well doesn't she I could not understand half of what she was saying But it was pretty impressive yes sirree Bob Been there done that confused my students thoroughly That is why I am going to write a totally non confusing book for all the youngsters out there who have been thoroughly confused by their counselors guided to within an inch of their lives by their advisors or have had their gray matter scrambled well by their egghead professors This book is going to tell you all about general tips and techniques for ideas for businesses where you are going to be working from your home and you do not have to go borrowing thousands of dollars for initial start up seed funding from your bank or from your relatives because you wanted to start big in keeping with your ego status and to soothe your own self respect and to make a splash in the neighborhood or business world
