concern of how vocational education systems become formed manifested within nation states and then are transformed through particular imperatives institutional arrangement and localised factors So the readers of this book whilst learning much about the Dutch vocational education system will also come to identify and engage with a selection of contributions that inform factors that situate shape and transform vocational education systems Such a focus seems important given an era when there are concerns to standardise and make uniform educational provisions often for administrative or political imperatives As such this book will be of interest not only to those who are engaged in the field of vocational education but those with an interest in educational policy practice and comparative studies *The English is Coming!* Leslie
