Self Managed Learning and the New Educational Paradigm Ian Cunningham, 2020-09-17 Self Managed Learning and the New Educational Paradigm proposes revolutionary change to the educational system The overwhelming research evidence is that the sum total of educational and training input accounts typically for only 10 20% of what makes a person an effective human being Balancing theory evidence and practice this ground breaking book demonstrates that current structures in education are ill equipped to support a learning based approach It establishes the case that learning as a core human activity is too important to be left to schools and other educational institutions The book goes beyond just a critique of current practice in showing how a New Educational Paradigm can work Self Managed Learning College for 9 17 year olds has no classrooms no lessons no imposed timetable and no imposed curriculum This is a place where students can learn whatever they want in any way they want and whenever they want And it works as evidenced by the lives of former students and from academic research Dr Ian Cunningham its founder draws also on his extensive work in using Self Managed Learning in many of the world s largest organisations to show how this new paradigm can be put into practice The book blends the unequivocal research evidence that we need a New Educational Paradigm with a real live demonstration of what it could look like It should be essential reading for anyone wanting to see how a new approach to education can be achieved

Mobile Learning Norbert Pachler, Ben Bachmair, John Cook, 2009-12-15 As with television and computers before it today s mobile technology challenges educators to respond and ensure their work is relevant to students What s changed is that this portable cross contextual way of engaging with the world is driving a more proactive approach to learning on the part of young people The first full length authored treatment of the relationship between the centrality of technological development in daily life and its potential as a means of education Mobile Learning charts the rapid emergence of new forms of mass communication and their potential for gathering shaping

and analyzing information studying their transformative capability and learning potential in the contexts of school and socio cultural change The focus is on mobile cell phones PDAs and to a lesser extent gaming devices and music players not as the next new thing but meaningfully integrated into education without objectifying the devices or technology itself And the book fully grounds readers by offering theoretical and conceptual models an analytical framework for understanding the issues recommendations for specialized resources and practical examples of mobile learning in formal as well as informal educational settings particularly with at risk students Among the topics covered Core issues in mobile learning Mobile devices as educational resources Socioeconomic approaches to mobile learning Creating situations that promote mobile learning Ubiquitous mobility and its implications for pedagogy Bridging the digital divide at the policy level Mobile Learning is a groundbreaking volume sure to stimulate both discussion and innovation among educational professionals interested in technology in the context of teaching and learning
