Dudu, 2023-03-01 This book critically examines the role of governments in promoting parity during and in post pandemic education This comes from the realisation that the pandemic has deepened the crisis by depleting the meagre resources that African countries might have devoted to normative educational practices where those on the margins would have been pushed further behind while the privileged would have been further initiated into the cultural and capital flows of private schools and historically research intensive institutions of higher learning This has far reaching implications for the education of underprivileged citizens and education particularly modes and modalities of delivery has to be reimaged to subvert the challenges wrought by the pandemic This book significantly bridges the gap between the pre and post COVID 19 pandemic pedagogical practices and the erstwhile modalities that have been resilient over time The book focuses on ways to stave off pedagogical challenges that face countries as the global pandemic makes its mark *International Teacher Judgement*

Practices Val Klenowski, 2017-10-02 Human judgements underlie all assessments regarding the quality of students understandings and such judgements are conceptually complex and elusive The study of the complexity of the judgement process is in its infancy but clearly warrants further critical investigation However what is demonstrated from the wide variety of international teacher judgement practices presented in this volume is that teacher judgement requires a lot more than a set of standards criteria and annotated examples Understandings of assessment theory by pre service teachers through to more experienced teachers and opportunities for all to critically reflect and consider their judgements of student

work are vital Teachers are struggling to maintain their interpretive freedom at the local professional level in contexts where central policies promote standardisation or regulation of judgement practice for accountability purposes This book was originally published as a special issue of Assessment in Education principles policy practice
