Advances in Teacher Education V. A. McClelland, Ved Varma, 2012 During the 1980s Britain's educational system was restructured and redirected. Of the many changes which were made perhaps the most far reaching have affected the education of teachers themselves. The contributors to this book have all been centrally involved in the reforming process of teacher education as providers, assessors or practitioners and it is as such that they reflect upon the significant features of the changes in teacher education while assessing the fulfilment of the initial promise. The book analyses recent advances in teacher education especially the trend towards improved teacher awareness and explains the application of new ideas in education considering their political causes and effects. The first critical appraisal of the Thatcherite reform of teacher education, this book also provides an up to date examination of the support services for teachers in service and shows what is amiss with the government's strategies for in service training. With its clear insights into the pressing concerns of teacher education today, *Advances in Teacher Education* will be an invaluable resource base for students, teachers, lecturers and educational administrators as they attempt to understand the motivation and stresses of teacher reform.

"Dig where you stand" 4 Kristín Bjarnadóttir, Fulvia Furinghetti, Marta Menghini, Johan Prytz, Gert Schubring, 2017-07-31 The Fourth International Conference on the History of Mathematics Education was hosted by Academy of Sciences and University of Turin, Italy. About 50 senior and junior researchers from 16 countries met for four days to talk about one topic: the history of mathematics education. In total 44 contributions were presented. The themes were: Ideas, people and movements; Transmission of ideas; Teacher education; Geometry and textbooks; Textbooks changes and origins; Curriculum and reform; Teaching in special institutions; and Teaching of geometry. In this volume you find 28 of the papers, all of them peer reviewed. Since the first international conference on the history of mathematics education, the aim has been to develop this area of research to attract more researchers and provide new insights that stimulate further digging. It is therefore very pleasing that so many new young researchers joined the conference presenting results from ongoing or recently finished PhD projects. This makes us confident about a prosperous future of this research area as we look forward to the Fifth International Conference on the History of Mathematics Education to be held in Utrecht, the Netherlands, in September 2017. Previous international conferences on the history of mathematics education: 2009 in Garaburri, Iceland; 2011 in Lisbon, Portugal; 2013 in Uppsala, Sweden.
