

Interpret and unpack the language of the test questions

It is important that teachers explicitly teach the following strategies and skills to adequately prepare their students for the language of the NAPLAN tests.

- a Teach the meaning of words or phrases that are critical for students to understand exactly what a question is asking. Create a variety of questions that use these words and phrases especially for the topics you are working on in class.
- a Make a class chart or glossary of these words, phrases and questions; add new entries as they are 'discovered' in the NAPLAN test and practice questions or text book questions. The list that follows contains some common examples

ESL support strategies

ESL learners have to master specialised mathematical language and may also have to learn new ways of organising knowledge.

- a Teachers can encourage ESL learners to keep personal glossaries adding new terminology as it arises and explaining the new words, phrases and questions in their own language.
- a Classroom charts can be used to display anything that will help the learners e.g. the steps in problem solving, different meanings of the same word, alternative words that can be used to mean the same thing like take away, subtract, minus, less than, difference etc.
- a As well as using charts, frameworks, picture cues and glossaries, teachers can provide scaffolding for ESL learners by modelling appropriate mathematical language to
 - accompany actions and the use of materials which allow for a hands-on, manipulative approach to learning
 - talk about Western concepts in the mathematical activity
 - link to what learners already know
