Teachers Mentoring Teachers A Practical Approach To Helping:

Teachers Mentoring Teachers John C. Daresh, 2002-11-27 This highly interactive guide offers a step by step method for planning implementing and evaluating mentor programs to maximize teacher satisfaction and productivity **Teacher Mentoring and Induction** Hal Portner, 2005-04-27 In this groundbreaking work Harry K Wong Laura Lipton Bruce Wellman and other top names in the field examine how successful mentoring and induction programs are developed and demonstrate how they can be replicated Becoming a Teacher Educator Anja Swennen, Marcel van der Klink, 2008-11-06 Becoming a Teacher Educator is an impressive book for teacher educators who want to be informed about the latest views and practices of their profession It is the first book that addresses a range of topics related to the work of teacher educators the induction of teacher educators and their further professional development Becoming a Teacher Educator has a practical focus and it provides theoretical insights experiences of experts and practical recommendations The book is rooted in the Association of Teacher Education in Europe ATEE and many of the chapters are written by authors who are active members of the ATEE Researchers and practitioners from different parts of Europe and beyond joined their efforts to write a book that is truly international and combines research practice and reflection Becoming a Teacher Educator is essential reading for novice teacher educators as well as for experienced teacher educators who want to keep up with the latest insights in their profession This book provides a guide for those who supervise novice and experienced teacher educators and for various professionals who are responsible for the professional development of teacher educators There is a growing need for evidence based resources made available to future teacher educators Since a learning society requires new sets of competencies of the main actors we are most in want of knowledgeable teacher educators that support the professional development of their student teachers This book fits the actual demands Dr Joost Lowyck Professor Emeritus former director of the Teacher Education Institute Leuven University This is an original book in a very important area The editors define the concept of teacher educator widely and I think therefore that the book is relevant for schools higher education and education authorities of all kinds The authorship and theme have wide relevance across Europe Australasia and North America Prof Bob Moon Professor in Education Teaching Studies Department of Education Open University UK The book highlights that while the current global focus is very much on the need to educate sufficient and highly qualified teachers little political focus is given to those who teach the teachers What makes this book distinctive for all engaged in teacher education whether experienced or novice is that it allows the spotlight on those who teach the teachers and the opportunity for teacher educators to discuss debate and seriously examine themselves as a profession Simone White Deakin University Australia

Mentor Development for Teacher Training Anne Punter, 2007 The 34 scenarios that make up this book are based upon real life teacher trainee issues They are designed to stimulate analysis of those issues to help the formulation of possible approaches to deal with them and to promote reflection on the role of the mentor as a practitioner advisor critical

friend and assessor There is no single solution to each issue but the material prompts an in depth discussion of what the issues are and a consideration of how to manage the complex set of factors towards a resolution
