The Trouble with Textbooks Gary A. Tobin, Dennis R. Ybarra, 2008-07-31 School textbooks in Iran Saudi Arabia Egypt and elsewhere in the Arab and Muslim worlds are filled with anti Western and anti Israel propaganda Most readers will be shocked to discover that history and geography textbooks widely used in America s elementary and secondary classrooms contain some of the very same inaccuracies about Jews Judaism and Israel Did you know that there is no record of any important Jewish contribution to the sciences World Civilizations Thomson Wadsworth Or that Christianity was started by a young Palestinian named Jesus The World Scott Foresman Pearson Supplemental materials and other classroom influences are even worse The Trouble with Textbooks exposes the poor scholarship and untruths in textbooks about Jews and Israel The problems uncovered in this ground breaking analysis are instructive and illustrate the need for reform in the way textbooks are developed written marketed and distributed Substitute another area how we teach American history Western civilization or comparative religion and we have another equally intriguing case study The Trouble with Textbooks shows what can go terribly wrong in discussing religion geography culture or history and in this case all of them The Trouble with Textbooks tells a cautionary tale for all readers whatever their background of how textbooks that Americans depend on to infuse young people with the values for good citizenship and to help acculturate students into the multicultural salad that is American life instead disparage some groups and teach historical distortions With millions of young people using these textbooks each year the denigration of some should be a concern for all *Holt People, Places, and Change* Robert J. Ellis, Peter Goodyear, 2018-02-19 This integrated collection of perspectives on the spaces of teaching and learning uses learning space to place educational practice in context It considers the complex relationships involved in the design management and use of contemporary learning spaces It sheds light on some of the problems of connecting the characteristics of spaces to the practices and outcomes of teaching and learning The contributions show how research into learning spaces can inform broader educational practices and how the practices of teaching learning and design can inform research The selection of chapters demonstrates the value of gathering together multiple sources of evidence viewed through different epistemological lenses in order to push the field forward in a timely fashion The book provides both a broad review of current practices as well as a deep dive into particular educational and epistemological challenges that the various approaches adopted entail Contrasts and commonalities between the different approaches emphasise the importance of developing a broad robust evidence base for practice in context This is the
