The Foundations Of Economics History And Theory In The Analysis Of Economic Reality:

The Foundations of Economics Walter Eucken, 1954 *The Foundations of Economics. History and Theory in the Analysis of Economic Reality ...* Translated by T.W. Hutchison Walter EUCKEN, Terence Wilmot Hutchison, 1950 *The Foundations of Economics* Walter Eucken, T W Hutchison, 1992-03-20

Walter Eucken's *The Foundations of Economics* (*Grundlagen der Nationalökonomie*) is the classic work of German economic literature in the past 60 years. In particular, the book was of great importance for the economic order that developed in the Federal Republic of Germany after the Second World War and made Germany the leading economic power in Europe. Eucken places great emphasis on economic reality in his work. Taking everyday observations as his starting point, he attempts to infer complex connections. Eucken provides the reader not only with a comprehensive criticism of classical economics but also, in particular, with an analysis of economic systems, economic order, and the course of economic events. As a consequence of the dramatic changes that have taken place in Eastern Europe, many states now find themselves facing problems similar to those faced by West Germany in its earliest days. Eucken's considerations can be of assistance in the search for the correct concepts. This reprint of the English translation of Eucken's book thus not only gives a broad readership renewed access to a classical work but can be instrumental in supporting the transition to a market economy in many countries and in facilitating the search for good concepts.

The Normative Foundations of European Competition Law Oles Andriychuk, 2017-08-25

Does competitive process constitute an autonomous societal value or is it a means for achieving more meritorious goals: welfare, growth, integration, and innovation? The hypothesis of *The Normative Foundations of European Competition Law* is that the former is the case. This insightful book analyses the phenomenon of competition from philosophical, legal, and economic perspectives, demonstrating exactly why competitive process should not be viewed only as an instrument. It consolidates various normative theories of freedom, market, and competition and explains how exactly they can be operationalized effectively in the matrix of the EU competition policy.

Arthur Spiethoff and the German Historical School of Economics Vitantonio Gioia, 2024-04-02

Arthur Spiethoff (1873–1957), an economist of the German Historical School of Economics, is best known for his theory of the business cycle. Despite Spiethoff calling for a unified reading of his work, his epistemological thinking has received less attention. This book addresses that gap by analysing Spiethoff's theory of the business cycle in the light of his epistemological views. Putting Spiethoff's work in context, the book also investigates the most significant features of the evolution of the research programme of the German Historical School of Economics with particular reference to the relationships between Schmoller, Sombart, Weber, and Spiethoff. In addition, Spiethoff's work is compared with some of the scientific orientations of the current debates on the epistemological side; the book examines the relationship between Spiethoff's views and some contemporary thinking on scientific realism as well as methodological pluralism in social sciences. And more broadly, it emphasises the analytical relevance of the historical approach in explaining the economic imbalances of

contemporary capitalism questioning the idea widespread in the neoclassical approach that taking historical specificities into account makes it hard to achieve a theoretically effective attitude This book is a significant addition to the literature on the German Historical School of Economics and the history of economic thought business cycle theory and macroeconomics more broadly *Max Weber and Contemporary Capitalism* N. Gane, 2012-09-10 This book explores the uses and limits of Max Weber's work for thinking sociologically about capitalism today The book argues that through Weber a network of concepts can be developed that can frame a sociological analysis of the present *The Idea of Economic Constitution in Europe*, 2022-06-08 Behind the controversies that have marked the history of the idea of Economic Constitution emerges the highly political issue of the room for manoeuvre left to public authorities in the economic sphere The notion thus encapsulates a fundamental tension between democracy and rule of law which model of legal ordering of the economy should prevail From physiocrats to neo liberals from the Weimar Republic to European integration from national constitutions to Global Governance this collective book invites us to explore the genealogy of the controversial concept of Economic Constitution The result of this interdisciplinary dialogue is a comprehensive reflection on the legal and political issues at stake in the current constitutionalization of the market order in Europe Contributors are Philippe Steiner Guillaume Gr goire Hugues Rabault Peter C Caldwell Thomas Biebricher Werner Bonefeld Serge Audier Vincent Valentin Pieter van Cleynenbreugel Xavier Miny Fr d ric Marty Claire Mongouachon Hans Wolfgang Micklitz Francesco Martucci Michael Wilkinson Hjalte Lokdam Susanna Maria Cafaro Peter Lindseth Cristina Fasone Pierre Nihoul Fran ois Colly Peter Christian M ller Graff Tony Prosser Damien Piron Mahmoud Mohamed Salah Stephen Gill Thibault Biscarie Sebastien Adalid and Christian Joerges Derri re les controverses qui jalonnent l histoire de l id e de Constitution conomique merge la question minemment politique de la marge de man uvre laiss e aux autorit s publiques dans la sph re conomique La notion cristallise ainsi une tension fondamentale entre d mocratie et tat de droit quel doit tre mod le d organisation et d ordonnancement juridique de l conomie Des physiocrates aux n olib raux de la R publique de Weimar l int gration europ enne des constitutions nationales la Global Governance cet ouvrage collectif nous invite d s lors explorer la g nalogie du concept pol mique de Constitution conomique Les auteurs ouvrent alors travers un dialogue interdisciplinaire constant une r flexion globale autour des enjeux juridiques et politiques du processus actuel de constitutionnalisation de l ordre de march en Europe **The Theory of Capitalism in the German Economic Tradition** Peter Koslowski, 2013-11-11 The theory of capitalism and of the economic order is the central topic of the German economic tradition in the 20th century Capitalism has not only been the topic for Marxist economics and for the Frankfurt School but also for the Historical School and for the postmarxist theory of capitalism in Ordo and Neo Liberalism as well as in Solidarism The question of the foundations of the economic order of the market economy and of capitalism as well as the problem whether a third path between capitalism and social ism is possible occupied this tradition from the Historical School to Ordo Liberalism and the theory of the social market economy The theory of capitalism

and of the social market economy as well as the critique and reform developed in this theoretical tradition is important for the theory of economic systems as well as for today's problems of the economic order. Its relevance for the present world economy is visible in the discussions whether there exist different models of capitalism and whether they can be described as the Anglo-American and as the Rhenish model of capitalism influenced by the thought of the German economic tradition. Michel Albert, the author of this classification, gave the key word in his book *Capitalism against Capitalism*. The papers of this book can help to clarify this debate by giving a first-hand introduction to some of the main economic thinkers of capitalism.

The Hand Behind the Invisible Hand Karl Mittermaier, 2020-07-22 Available Open Access under CC BY-NC-ND. Made famous by the Enlightenment thinker Adam Smith, the concept of an invisible hand might be taken to imply that a government that governs least governs the best from the viewpoint of society. Here an invisible hand appears to represent unfettered market forces. Drawing from this much-contested notion, Mittermaier indicates why such a view represents only one side of the story and distinguishes between what he calls pragmatic and dogmatic free marketeers. Published posthumously with new contributions by Daniel Klein, Rod O'Donnell, and Christopher Torr, this book outlines Mittermaier's main thesis and his relevance for ongoing debates within economics, politics, sociology, and philosophy. [Routledge Handbook of the History of Global Economic Thought](#) Vincent Barnett, 2014-08-27 The *Routledge Handbook of the History of Global Economic Thought* offers the first comprehensive overview of the long-run history of economic thought from a truly international perspective. Although globalization has facilitated the spread of ideas between nations, the history of economics has tended to be studied either thematically by topic in terms of different currents of thought or individually by economist. Work has been published in the past on the economic thought traditions of specific countries, but this pioneering volume is unique in offering a wide-ranging comparative account of the development of economic ideas and philosophies on the international stage. The volume brings together leading experts on the development of economic ideas from across the world in order to offer a truly international comparison of the economics within nation-states. Each author presents a long-term perspective on economics in their region, allowing global patterns in the progress of economic ideas over time to be identified. The specially commissioned chapters cover the vast sweep of the history of economics across five world regions, including Europe (England, Scotland, Ireland, Italy, Greece, Spain, Portugal, Germany, Sweden, Russia, and the Ukraine), the Americas (the USA, Canada, Mexico, and Central America), Spanish-speaking South America (Brazil and the Caribbean), the Middle East (Turkey, Israel, Arab Islamic Economics, Persia, Iran), North Africa, Africa (West Africa, Southern Africa, Mozambique, and Angola), and the Asia-Pacific Region (Australia and New Zealand, China, Southeast Asia, the Asian Tigers, India). This rigorous, ambitious, and highly scholarly volume will be of key interest to students, academics, policy professionals, and to interested general readers across the globe.
