Annual 1988-1989 Michael Marien, Lane Jennings, 1990-01-01 BMW Z cars have carved a huge reputation for themselves in a very short time From the revolutionary and innovative Z1 of the late 1980s to the beautiful and exclusive Z8 of more recent times via the popular Z3 and its controversial replacement the Z4 the family has made BMW's name in the increasingly competitive sports car market

Unfreezing the Arctic Andrew Stuhl, 2016-11-03 This account of a region transformed and threatened offers a timely historical reflection on the important social role of science and scientists Historical Geography In recent years environmentalists have pointed urgently to the melting Arctic as a leading indicator of climate change While climate change has unleashed profound transformations in the region many commentators mislabel them as unprecedented In reality the landscapes of the North American Arctic as well as relations among scientists Inuit and federal governments are products of the region's colonial past And even as policy analysts activists and scholars clamor about the future of our world's northern rim few truly understand its past In Unfreezing the Arctic Andrew Stuhl brings a fresh perspective to this defining challenge of our time Stuhl weaves together a wealth of episodes into a transnational history of the North American Arctic providing a richer understanding of its social and environmental transformation Drawing on historical records and extensive ethnographic fieldwork as well as time spent living in the Northwest Territories he examines the long running interplay of scientific exploration colonial control the experiences of Inuit residents and multinational investments in natural resources With a comprehensive look at a century of scientific activity he covers the political economic environmental and social history of this transboundary region A worthy addition to the recent wave of work on northern history Bridging the histories of colonialism resource management military activity and Indigenous self determination Stuhl focuses on Alaska and northwest Canada including the Beaufort Sea Mackenzie Delta and surrounding region Canadian Journal of History The author intends to donate all royalties from this book to the Alaska Youth for Environmental Action AYE and East Three School's On the Land Program

The City of Words Alberto Manguel, 2008 And yet stories even the best and truest can't save us from our own folly Stories can't protect us from suffering and error from natural and artificial catastrophes from our own suicidal greed The only thing they can do is offer consolation for suffering and words to name our experience Stories can tell us who we are and suggest ways of imagining a future that without calling for comfortable happy endings may offer us ways of remaining alive together on this much abused earth Based on Canada's 2007 CBC Massey Lectures to be broadcast in Australia by ABC Radio National in April 2008 Alberto Manguel's The City of Words takes a fresh look at the rise of violent intolerance in our societies We strive to build societies with sets of values all citizens can agree on But something has gone wrong race riots in France political murder in the Netherlands bombings in Britain and Bali are these symptoms of a multicultural experiment gone awry Why is it so difficult for us to live together when the alternatives are demonstrably horrifying With his trademark wit and erudition Alberto Manguel suggests a fresh approach we should look at what visionaries poets novelists essayists and filmmakers have to say about building societies Perhaps the stories we tell hold

secret keys to the human heart From Cassandra to Jack London the Epic of Gilgamesh to the computer Hal in 2001 A Space Odyssey Don Quixote to Atanarjuat The Fast Runner Manguel draws fascinating and revelatory parallels between the personal and political realities of our present day world and those of myth legend and story
