The Foreign Office And Finland 1938 1940 Diplomatic Sideshow:

The Foreign Office and Finland, 1938-1940 Craig Gerrard, 2005 The book looks at the ways in which the Northern Department of the Foreign Office approached matters pertaining to Finland in the years 1938 1940 concentrating on the particular issues of the proposed rearmament of the land Islands Finnish rearmament and aid to Finland during the Winter War with the Soviet Union At the beginning of this period the Northern Department officials aimed at giving support to Finland while at the same time attempting to create an environment where Finland and the Soviet Union could reach agreement thus keeping Finland out of the German sphere of influence Their belief that the security interests of the USSR must be considered when dealing with Finland changed after the Soviet invasion of Finland at the end of November 1939 From this point on the ability of the Northern Department officials to influence policy towards Finland declined as the Cabinet became more interested in the situation Nevertheless Laurence Collier the head of the department and his associates continued to recommend particular forms of action and their ideas were frequently at odds with what was being decided by government Their recommendations for military intervention

The Foreign Office and Finland Craig Gerrard, 2004-10-10 The actions and decisions of the Northern Department of the Foreign Office at a time of great international tension and conflict

The Foreign Office's War, 1939-41 Keith Neilson, 2022 Provides a forceful corrective to the idea that Britain stood alone until the invasion of the Soviet Union and the attack on Pearl Harbor brought about the Grand Alliance Based on extensive archival research the book demonstrates that 1939 to 1941 was a period of intensive diplomatic activity by the British Foreign Office designed to ensure that Britain's potential enemies especially Soviet Russia Italy and Japan remained neutral and that its most desirable potential ally the United States remained as friendly as possible until it could be persuaded to join in the conflict The book highlights the importance of diplomacy towards neutrals for British policy considers the complexities of the situation tying together issues such as blockade and the disposition of British forces in various theatres explores decision making within the British government examining how the diplomatic considerations of the Foreign Office played into wider debates amongst ministers and senior civil servants and discusses the various courses towards neutrals including alternatives advocated within the Foreign Office Overall the book provides a rich highly nuanced view of British policy in this crucial period

Globalization and Conflict Robert G. Patman, 2006-08-10 This volume highlights the gap between the new security environment and the notion of state centred national security favoured by Washington showing how a Cold War phenomenon known as the national security state in which defence and foreign policy interests essentially converge remains largely intact The conventional wisdom since the suicide attacks of 9 11 is that the world has been transformed and according to President Bush September 11 changed the strategic thinking of the US This book challenges these assumptions Indeed the Bush administration's National Security strategy of 2002 has reinvigorated and even extended the idea of national security Paradoxically the renewed emphasis on a distinctly state

centred approach to security including the War on Terror has unfolded during an era of deepening globalization Drawing on the international expertise of fourteen specialists the book examines four inter related themes the impact of globalization on the concept of security the strategic outlook of the world s only superpower the US the new conflicts that have come to characterize the post Cold War era efforts to regulate the emerging patterns of conflict in the world Globalization and Conflict will be essential reading for students of strategic studies security studies and international relations

International Law and International Relations Thomas J. Biersteker, Peter J. Spiro, Chandra Lekha Sriram, Veronica I. Raffo, 2006-10-19 This unique volume examines the opportunities for and initiates work in interdisciplinary research between the fields of international law and international relations disciplines that have engaged little with one another since the Second World War Written by leading experts in the fields of international law and international relations it argues that such interdisciplinary research is central to the creation of a knowledge base among IR scholars and lawyers for the effective analysis and governance of macro and micro phenomena International law is at the heart of international relations but due to challenges of codification and enforceability its apparent impact has been predominantly limited to commercial and civil arrangements International lawyers have been saying for years that law matters in international affairs and now current events are proving them right International Law and International Relations makes a powerful contribution to the theory and practice of global security by initiating a research agenda building an empirical base and offering a multidisciplinary approach that provides concrete answers to real world problems of governance This book will be of great interest to all students of international law international relations and governance

Causes and Consequences of International Conflict Glenn Palmer, 2009-10-16 Investigation into the causes of international conflict has in many ways formed the central locus of the early work in the scientific investigation of world politics This edited volume contains the most recent quantitative work in this area reflecting the current state of the field in the topics addressed the data utilized and the methods employed The book is divided into three parts presenting first some recent contributions to the work on the causes of international conflict set in the context of realist theories The second part addresses issues relating to data methods and cases used to analyze international conflict while the third part presents some examples of the use of a variety of different methods to answer questions relating to issues which engage international relations scholars today The chapters focus on a variety of pertinent topics and include discussions of important innovations in our ability to analyze conflict such as the introduction of the Militarized Interstate Dispute MID data

European Security in a Global Context Thierry Tardy, 2010-06-09 This new edited volume examines contemporary European security from three different standpoints It explores security dynamics first within Europe second the interaction patterns between Europe and other parts of the world the United States Africa the Middle East China and India and finally the external perceptions of European security The first part of the book analyses the European security landscape The roles of EU NATO and the OSCE are given particular

attention as is the impact of their evolution or enlargement on the European security architecture and European security dynamics In this context Russia's repositioning as a major power appears as a shaping factor of contemporary European geopolitics The second part presents European security from an external perspective and considers interactions between Europe and other states or regions Security trends and actors in Europe are examined from an American Chinese and Indian perspective while Europe Africa and Europe Middle East relations are also addressed This book will be of great interest to students of European Security European politics and IR in general **Controlling the Weapons of War** Brian

Rappert, 2013-05-13 A fresh examination of the ethical and intellectual issues and dilemmas associated with attempts to establish formal humanitarian limits on weaponry This new study considers how governments non governmental organizations academics political commentators and others have responded to the predicaments associated with imposing classifications about the relative acceptability of force and what is accomplished in their strategies for doing so It develops these issues through combining thematic and conceptual analysis with the examination of varied cases of prohibitions on conventional and unconventional weapons through customary and statutory laws multilateral treaties UN resolutions and national legislation The book will appeal to students of security studies military technology peace studies international relations and discourse theory *Militancy and Violence in West Africa* James Gow, Funmi Olonisakin, Ernst

Dijxhoorn, 2013-07-18 This volume provides a systematic and cross regional analysis of radicalisation militancy and violence in West Africa Concern about terrorism in or from West Africa has been recognised in academic research and the adoption of militarised approaches to addressing it questioned However the basis for that questioning the need to investigate factors such as the historical and socio economic roots of militancy is not developed nor is it substantiated in existing studies The significant impact of religiously motivated radicalisation and violence in West Africa upon international security makes it essential to understand the issues of militancy and violence in the region In this volume the authors draw upon empirical research in West Africa to develop understanding in these areas Over the course of several chapters written by leading experts in the field the book successfully blends historical and conceptual analysis with new empirical research gathered from focus group discussions and research interviews Each of these core studies is structured around five interrelated issues tracing the antecedents of radicalisation monitoring trends identifying actors anticipating possibilities and analysing the strength of existing preventive mechanisms This book will be of much interest to students of African security African politics radicalisation political Islam war and conflict studies and security studies in general *Private Security Contractors and*

New Wars Kateri Carmola, 2010-02-05 This book addresses the ambiguities of the growing use of private security contractors and provides guidance as to how our expectations about regulating this expanding service industry will have to be adjusted In the warzones of Iraq and Afghanistan many of those who carry weapons are not legally combatants nor are they protected civilians They are contracted by governments businesses and NGOs to provide armed security Often mistaken as members of

armed forces they are instead part of a new protean proxy force that works alongside the military in a multitude of shifting roles and overseen by a matrix of contracts and regulations This book analyzes the growing industry of these private military and security companies PMSCs used in warzones and other high risk areas PMSCs are the result of a unique combination of circumstances including a change in the idea of soldiering insurance industry analyses that require security contractors and a need for governments to distance themselves from potentially criminal conduct The book argues that PMSCs are a unique type of organization combining attributes from worlds of the military business and humanitarian organizations This makes them particularly resistant to oversight The legal status of these companies and those they employ is also hard to ascertain which weakens the multiple regulatory tools available PMSCs also fall between the cracks in ethical debates about their use seeming to be both justifiable and objectionable This transformation in military operations is a seemingly irreversible product of more general changes in the relationship between the individual citizen and the state This book will be of much interest to students of private security companies war and conflict studies security studies and IR in general Kateri Carmola is the Christian A Johnson Professor of Political Science at Middlebury College in Vermont She received her Ph D from the University of California Berkeley
