The Formation Of National States In Western Europe:

The Formation of National States in Western Europe Social Science Research Council (U.S.). Committee on Comparative Politics, 1975 Nine essays examine and evaluate in relationship with current political and economic conditions the events processes preconditions and developments between 1500 and 1900 which brought about the establishment of powerful nation states

States and Collective Action Pierre Birnbaum, 1988 An analysis of the influence of each type of state upon the development of various collective action and mobilization processes The author aims to establish the crucial importance of the state as a quasi independent variable

The State Tradition in Western Europe Kenneth Dyson, 2024-10-31 Why have continental European societies developed the idea of the abstract impersonal state as the fundamental institution of political rule Why on the other hand has this idea played a relatively insignificant part in the history of English speaking countries It is to such questions that this major study is addressed With clarity and conciseness Kenneth Dyson examines the fascinating tapestry of thought about public authority that the state tradition represents and identifies the major individual contributions to that tapestry In addition to offering a clear conceptualisation of state he deals with such key issues as the role of the intellectual the social function of state theories and the difficulties of accommodating state and democracy

The Geography of Western Europe Paul L Knox, 2015-11-19 This book provides a comprehensive survey of the social geography of Western Europe It begins by outlining the character of the region and proceeds with an exploration of demographic and cultural features including migration and ethnic groups The political organisation of nations and regions are analysed along with regional change and development The study concludes with a consideration of key issues central to the geography of social well being such as regional convergence divergence and the impact of public expenditure patterns

In the Mirror of the Third World Sandra Halperin, 2018-09-05 In Marx's familiar dictum the more developed country shows the less developed an image of its own future Turning this idea upside down In the Mirror of the Third World looks to the contemporary Third World for a reflection of European history The resulting view challenges standard accounts of European social economic and political development Sandra Halperin's analysis of the European experience begins where studies of Third World development often start considering the legacies of colonial domination Europe also had a colonial past she reminds us and the states of Europe like those of today's Third World were the product of colonialism and imperialism From this starting point Halperin traces features characteristic of Third World development through the history of European capitalism enclave economies oriented to foreign markets weak middle classes alliances among the state traditional landowning elites and new industrial classes unstable and partial democracy sharp inequalities and increasing poverty all as much a part of European society on the eve of World War I as they are of developing countries today Halperin

also emphasizes the emergence of a militant literal religion in Europe and its critical role in the class struggles of the nineteenth century Handbook of Administrative History Jos Raadschelders, 2017-07-05 Public administration is commonly assumed to be a young discipline rooted in law and political science with little history of its own Likewise teaching and scholarship in this field is often career oriented and geared either toward the search for immediately usable knowledge or guidelines and prescriptions for the future Although most administrative scientists would acknowledge that their field has a history their time horizon is limited to the recent past Raadschelders demonstrates that public administration has in fact a long standing tradition both in practice and in writing administration has been an issue ever since human beings recognized the need to organize themselves in order to organize the environment in which they lived This history in turn underlines the need for administrators to be aware of the importance and contemporary impact of past decisions and old traditions In seeking to go beyond the usual problem solving and future oriented studies of public administration this volume adds greatly to the cognitive richness of this field of research Indeed the search for theoretical generalizations will profit from an approach that unravels long term trends in the development of administration and government Raadschelders approaches public administration history from a dual perspective as trained historian and professor of public administration The volume is appropriately called a handbook in view of its methodical listing of the literature on administrative history together with summaries of numerous authors principal theories The second chapter is an essay on sources in the field including an extended bibliography These parts of the book alone make it useful to scholars in the field Raadschelders is helpful in other ways as well The third and fourth chapters offer a highly sophisticated discussion of methodological problems encountered in writing administrative history including the issue of perceiving stage

The Role of Regions and Sub-National Actors in Europe Stephen Weatherill, Ulf Bernitz, 2005-06-15 The essays gathered in this collection examine the involvement of self governing sub national and regional actors in the law and policy making of the European Union State power is today exercised in the context of the complex institutional environment of the EU But what of regions and sub national actors Are their interests adequately represented can they advance them or can they at least protect them from unwitting or calculated damage This book surveys the broad questions of law and political science and investigates the contribution of the EU s Committee of the Regions and also bottom up initiatives launched by the regions themselves Given that much regional autonomy has been hard won one would suppose that the centralising influence flowing from the EU s intrusion into the domestic settlement would be treated with extreme caution by the regions Moreover among the Member States there is great diversity in the patterns of political organisation adopted to cope with the tension between the centralisation of power and respect for local autonomy Case studies including Spain Germany and Finland reveal that there is no single consistent historical narrative States change as the UK s recent experience illustrates The book offers findings that are interesting at a general level in investigating patterns of multi level governance but is also rich in case specific information
