Bouchez, 2013-12-01 It is no surprise that the subject The Future of the Law of the Sea meets with special interest in the Netherlands The sea is our element the roaring sea our glory as the old folksong says For a nation whose and prosperity are so closely connected with the sea it is of the fate utmost importance to which regime the nations that border upon sail and exploit the sea are subjected Until recently nobody worried about the legal regime of the sea The principle of the freedom of the sea since Hugo Grotius one of the strongest hardly assailable principles of inter national law was it not of paramount importance for the Netherlands Since the Second World War this security does not exist any more International Law is shaken in its foundations This law once anchored in the sense of justice of the then leading nations which certainly did not think similarly but to a certain extent along the same lines has been shaken by the development of groups which no longer accept these rules as the guiding principle of their actions The alarmingly scant willingness among the younger nations to accept the compulsory jurisdiction of the International Court and the scarce assignments conferred to that Court bear witness to this crisis More and more International Law is traversed by economical sociological political and power factors which are pushing aside the conceptions of law once considered stable **The Program of the Freedom of the Sea** Christian Meurer, 1919 **The Law of the Sea** Robin Rolf Churchill, Alan Vaughan Lowe, 1983 Introductory survey covering 1982 U N Convention on the Law of the Sea and the customary and conventional law which supplements it **International Law and the World War** James Wilford Garner, 1920 **Freedom of Navigation in the Exclusive Economic Zone** Thuy Van Tran, 2022-01-05 This book looks into ship source pollution from an EU perspective and in view of recent far reaching initiatives undertaken by this regional organization These constitute the first regional approach with respect to ship source pollution in the context of the freedom of navigation in the exclusive economic zone where criminalization beyond generally accepted international standards is arguably envisaged With respect to the freedom of navigation of other States in this exclusive economic zone this book confirms that it is closely related to and at times serves as a prerequisite for the exercise of their other freedoms and lawful uses of the sea therein and that any impact on the freedom of navigation of other States in the exclusive economic zone may affect their other freedoms or associated rights Hearings United States. Congress Senate, 1935 **Current Policy** United States. Department of State, 1985 *Origin and Development Pf the Law of the Sea* Ram Prakash Anand, 1983 This work presents an in depth analysis of the most complex of the many ocean boundary delimitation problems confronting neighboring states in the Pacific region In each case the various factors influencing the parties to the dispute are examined in detail alternative diplomatic options are compared Special emphasis is given to the problems of Southeast Asia East Asia the Northeast Pacific but regional developments in the Southwest Pacific the Central Southeast Pacific are also discussed

The authors who are prominent specialists in the field of ocean policy studies place their factor and option analysis of these difficult disputes within a multidisciplinary functionalist framework offer some original proposals for innovative ocean diplomacy that now seem realistic in light of recent improvements in the international political arena
