East Asian International Relations in History Kyu-hyun Jo, 2024-08-28 This book provides a sweeping overview of East Asian international relations in history from the nineteenth century onwards with a focus on Korea and its relationship with East Asia and the USA In contrast with many books which concentrate exclusively on the twentieth century this book offers a long term perspective on modernity and modernization in East Asia It addresses the tributary system the Meiji Restoration Japanese imperialism in East Asia and the Cold War in East Asia It also incorporates the First and Second Indochina Wars from Vietnam s perspective and expands the geographical scope of East Asia beyond the traditional framework of Korea Japan and China The book begins with the tributary system as a starting point of East Asian modernity in contrast to the old view that the tributary system was not a modern system It rejects the idea that Japan was modernizing while Korea remained stagnant and shows why Japanese colonialism continues to be controversial and problematic Through the book s emphasis on Vietnam s perspective of the Indochina Wars it places much value on nationalism anti imperialism and decolonization as forces of modernity and modernization Relevant to scholars and students in history international relations and East Asian studies more broadly the book brings with it a novel fresh and innovative approach to East Asian history

Food Security, Agricultural Policies and Economic

Growth Niek Koning, 2017-04-21 Using a political economic approach supplemented with insights from human ecology this volume analyzes the long term dynamics of food security and economic growth The book begins by discussing the nature of preindustrial food crises and the changes that have occurred since the 19th century with the ascent of technical science and the fossil fuel revolution It explains how these changes improved living standards but that the realization of this improvement was usually dependent on government support for smallholder modernization The author sets out how the evolution of food security in different regions has been influenced by farm policy choices and how these choices were shaped by local societal characteristics international relations and changing configurations in metropolitan countries Separate chapters are devoted to the interaction of this evolution with debates on food security and economic growth and with international economic policies The final chapters highlight the new challenges for global food security that will arise as traditional sources of biomass production and the more easily extractable reserves of fossil biomass become depleted or can no longer be used Overall the book emphasizes the inadequacy of current explanations with regard to these challenges It explores what is needed to ensure a sustainable future and calls for a rethinking of these issues a necessary reflection in today's unstable global political situation

[Historical Abstracts](#) , 1992 Vols 17 18 cover 1775 1914 [Asian Translation Traditions](#) Eva Tsoi Hung Hung, Judy Wakabayashi, 2014-07-16 Translation Studies one of the fastest developing fields in the humanities since the early 1980s has so far been Euro centric both in its theoretical explorations and in its historical grounding One of the major reasons for this is the unavailability of reliable data and systematic analysis of translation activities in non European cultures While a number of scholars in the Western tradition of translation studies have become increasingly aware of this bias and its problems practically indicates that the burden of addressing such deficiencies and imbalances should be on the shoulders of scholars who are conversant with the non Western translation traditions and capable of engaging in much needed basic research This book brings together eleven scholars with expertise in different Asian translation traditions who highlight language and cultural environments as well as perceptions and modes of operation

often different from those in the Western tradition Their contributions enhance our understanding of the various elements that influence the transfer of knowledge across cultures and provide invaluable data for the study of translation as a force for cultural development and cultural planning Contributors include Eva Hung Judy Wakabayashi Lawrence Wong Yoshihiro Osawa Teresa Hyun Keith Taylor Rita Kothari Doris Jedamski Raniela Barbaza and Bill Cummings *Paperbound Books in Print*, 1992 *Buddhism--art and Faith* W.
