Archaeological Discoveries at the Temple of Ramesses II in Abydos Sameh Iskander, 2025-09-30 This book is the first of a three volume study of the structures and objects discovered during nine seasons of excavations 2017-2025 within the Ramesses II temple precinct conducted under the direction of Sameh Iskander This volume contains five chapters organized in two parts the first presents in three chapters a clear understanding of the precinct site its extant architectural mud brick structures outside the stone temple and a careful investigation of the archaeological objects and ceramic data obtained from the excavation The second part focuses on the data obtained from the excavation of a mysterious mixed deposit of materials that were brought from unknown locations and dumped in one of the temple's magazines S15 This deposit offers new insights into our understanding of Abydos a site rich in historical and archaeological significance **Social**

Zooarchaeology Nerissa Russell, 2011-11-14 This is the first book to provide a systematic overview of social zooarchaeology which takes a holistic view of human animal relations in the past Until recently archaeological analysis of faunal evidence has primarily focused on the role of animals in the human diet and subsistence economy This book however argues that animals have always played many more roles in human societies as wealth companions spirit helpers sacrificial victims totems centerpieces of feasts objects of taboos and more These social factors are as significant as taphonomic processes in shaping animal bone assemblages Nerissa Russell uses evidence derived from not only zooarchaeology but also ethnography history and classical studies to suggest the range of human animal relationships and to examine their importance in human society Through exploring the significance of animals to ancient humans this book provides a richer picture of past societies

Zooarchaeology Elizabeth J. Reitz, Elizabeth S. Wing, 1999-02-04 Zooarchaeology is a detailed reference manual for students and professional archaeologists interested in identifying and analysing animal remains from archaeological sites Drawing on material from all over the world and covering a time span from the Pleistocene to the nineteenth century AD the emphasis is on animals whose remains inform us about many aspects of the relationships between humans and their natural and social environments especially site formation processes subsistence strategies and paleoenvironments The authors discuss suitable methods and theories for all vertebrate classes and molluscs and include hypothetical examples to demonstrate these There are extensive references and illustrations to help in the process of identification **Case Studies**

in Environmental Archaeology Elizabeth Jean Reitz, Lee A. Newsom, Sylvia J. Scudder, 1996 This volume contains case studies in environmental archaeology that apply data obtained from various disciplines including zooarchaeology archaeobotany human biology and geoarchaeology to explore important anthropological issues Studies include geological and biological data from sites located in North America the Caribbean basin and South America Rather than critiquing or advocating specific environmental techniques each study demonstrates how and why the information obtained from their use is important to anthropologists and archaeologists Appendices: Persistent Traditions Luc W.S.W. Amkreutz, 2013-12-19

The adoption of agriculture is one of the major developments in human history Archaeological studies have demonstrated that the trajectories of Neolithisation in Northwest Europe were diverse This book presents a study into the archaeology of the communities involved in the process of Neolithisation in the Lower Rhine Area 5500 2500 cal BC It elucidates the role played by the indigenous communities in relation to their environmental context and in view of the changes that becoming Neolithic brought about This volume contains the appendices to the thesis Persistent traditions A long term perspective on communities in the process of Neolithisation in the Lower Rhine Area 5500 2500 cal BC These constitute a comprehensive inventory of 159 mostly excavated archaeological sites in the Lower Rhine Area for which general characteristics were recorded Their analysis shows that the succession of Late Mesolithic Swifterbant culture Hazendonk group and Vlaardingen culture societies represents a continuous long term tradition of inhabitation of the wetlands and wetland margins of this area forming a culturally continuous record of communities in the transition to agriculture The site catalogue forms both an overview of and detailed introduction into the site based archaeology of this time frame After demonstrating the diversity of the Mesolithic the subsequent developments regarding Neolithisation are studied from an indigenous perspective Foregrounding the relationship between local communities and the dynamic wetland landscape the archaeological evidence regarding its regional inhabitation points to long term flexible behaviour and pragmatic decisions being made For the interpretation of Neolithisation this study offers a complementary approach to existing research Instead of arguing for a short transition based on the economic importance of domesticates and cultigens at sites the emphasis is placed on the persistent traditions of the communities involved New elements instead of bringing about radical changes are shown to be attuned to existing hunter gatherer practices By documenting indications of the mentalit of the inhabitants of the wetlands it is demonstrated that their mindset remained essentially Mesolithic for millennia

The Psychology of the Human-Animal Bond Christopher Blazina, Güler Boyraz, David Shen-Miller, 2011-06-22 There have been dramatic increases in the financial emotional and psychological investment in pets over the past four decades The increasing importance of animal companions in people s lives has resulted in growing emphasis on the human animal bond within academic literature This book introduces practicing and emerging professionals to vital subject matter concerning this growing specialty area by providing an essential framework and information through which to consider the unique contextual backdrop of the human animal bond Such contexts include a wide array of themes including issues of attachment and loss success and frustration with making and sustaining connections world views regarding animal ethics familial history of neglect or abuse and cultural dynamics that speak to the order of things between mankind and nature Adopting a contextual stance will aid mental health professionals in appreciating why and how this connection has become a significant part of everyday life for many As with any other important clinical dynamic training and preparation are needed to gain competence for professional practice and research To this end an ensemble of international experts across the fields of psychology and mental health explore topics

that will help both new and established clinicians increase and understanding of the various ways the human animal bond manifests itself Perspectives from beyond the scope of psychology and mental health such as anthropology philosophy literature religion and history are included to provide a sampling of the significant contexts in which the human animal bond is established What brings these divergent topics together in a meaningful way is their relevance and centrality to the contextual bonds that underlie the human animal connection This text will be a valuable resource that provides opportunities to deepen one s expertise in understanding the psychology of the human animal bond Aridity, change and conflict in Africa Michael Bollig,Olaf Bubbenzer,Ralf Vogelsang,Hans-Peter Wotzka,2007-01-01 *European Societies in the Bronze Age* A. F. Harding,2000-05-18 The Bronze Age roughly 2500 to 750 BC was the last fully prehistoric period in Europe and a crucial element in the formation of the Europe that emerged into history in the later first millennium BC This book focuses on the material culture remains of the period and through them provides an interpretation of the main trends in human development that occurred during this timespan It pays particular attention to the discoveries and theoretical advances of the last twenty years that have necessitated a major revision of received opinions about many aspects of the Bronze Age Arranged thematically it reviews the evidence for a range of topics in cross cultural fashion defining which major characteristics of the period were universal and which culture and area specific The result is a comprehensive study that will be of value to specialists and students while remaining accessible to the non specialist Animals as Domesticates Juliet Clutton-Brock,2012-01-01 Drawing on the latest research in archaeozoology archaeology and molecular biology *Animals as Domesticates* traces the history of the domestication of animals around the world From the llamas of South America and the turkeys of North America to the cattle of India and the Australian dingo this fascinating book explores the history of the complex relationships between humans and their domestic animals With expert insight into the biological and cultural processes of domestication Clutton Brock suggests how the human instinct for nurturing may have transformed relationships between predator and prey and she explains how animals have become companions livestock and laborers The changing face of domestication is traced from the spread of the earliest livestock around the Neolithic Old World through ancient Egypt the Greek and Roman empires South East Asia and up to the modern industrial age **Beyond Foraging and Collecting** Ben Fitzhugh,Junko Habu,2012-12-06 LEWIS R BINFORD AND AMBER L JOHNSON The organizers of this volume have brought together authors who have worked on local sequences much as traditional archaeologists tended to do however with the modern goal of addressing evolutionary change in hunter gatherer systems over long time spans Given this ambitious goal they wisely chose to ask the authors to build their treatments around a focal question the utility of the forager collector continuum Binford 1980 for research on archaeological sequences Needless to say Binford was flat tered by their choice and understandably read the papers with a great deal of interest When he was asked to write the foreword to this provocative book he expected to learn new things and in this he has not been disappointed The common organizing questions addressed

among the contributors to this volume are simply how useful is the forager collector continuum for explanatory research on sequences and what else might we need to know to explain evolutionary change in hunter gatherer adaptations Most sequences document systems change in some sense Though we don t necessarily know how much synchronous systemic variability there might have been relative to the documented sequence most authors have tried to address the problem of within systems variability In this sense most are operating with sophistication not seen among traditional culture historians The primary problem for archaeologists of the generation prior to Binford was how to date archaeological materials
