Sketches For A Life Of Wassily:

Sketches for a Life of Wassily Lydia Davis, 1981 **The Poetics of Fragmentation in Contemporary British and American Fiction** Vanessa Guignery, Wojciech Drąg, 2019-12-02

The last decades have seen a revival of fragmentation in British and American works of fiction that deny linearity coherence and continuity in favour of disruption gaps and fissures. Authors such as Ali Smith, David Mitchell and David Shields have sought new ways of representing our global media saturated contemporary experience which differ from modernist and postmodernist experimentations from which the writers nevertheless draw inspiration. This volume aims to investigate some of the most important contributions to fragmentary literature from British and American writers since the 1990s with a particular emphasis on texts released in the twenty first century. The chapters within examine whether contemporary forms of literary fragmentation constitute a return to the modernist episteme or the fragmented literature of exhaustion of the 1960s mark a continuity with postmodernist aesthetics or signal a deviation from past models and an attempt to reflect today's accelerated culture of social media and over communication. Contributors theorise and classify literary fragments, examine the relationship between fragmentation and the Zeitgeist influenced by globalisation, media saturation and social networks, analyse the mechanics of multimodal and multimedial fictions and consider the capacity of literary fragmentation to represent personal or collective trauma and to address ethical concerns. They also investigate the ways in which the architecture of the printed book is destabilised and how aesthetic processes involving fragmentation, bricolage and or collage raise ontological, ethical and epistemological questions about the globalised contemporary world we live in and its relation to the self and the other. Besides the aforementioned authors, the volume makes reference to the works of J. G. Ballard, Julian Barnes, Mark Z. Danielewski, David Markson, Jonathan Safran Foer, David Foster Wallace, Jeanette Winterson and several others.

The Art Theory of Wassily Kandinsky, 1909-1928 Christopher Short, 2010. Kandinsky's theory of art has usually been treated as little more than a guide to help our understanding of his paintings. In contrast, this book attends primarily to the artist's writings on art; thus his art theory is treated on its own terms. Drawing on the diverse literature that has been written on Kandinsky's art and theory, the author demonstrates that while many different perspectives on his work have been identified, none holds the key to that work. Instead, the book shows Kandinsky's method in his writings to be highly eclectic, resulting in an exciting and challenging variety of content. A description that also applies as a postscript to the book shows to his method in painting. Kandinsky, however, transcended this diversity and consistently sought evidence of the unity of all things, something that would be realised through his understanding of the term synthesis. The book follows Kandinsky's fascinating attempts to establish synthesis not only in art but also in other disciplines including science, mathematics, law and politics in his key theoretical publications *On the Spiritual in Art* (1911) and *Point and Line to Plane* (1926). The result is a new and innovative understanding of both Kandinsky's art theory and his art.
